Prerna Jani

DOB- 5 March 2011

Report for 2023-24 (First Term)

Attendance- 183 out of 183 days

Introduction

My name is Prerna Jani, and I am in the progress group. I enjoy studying with my classmates at Auro-Mira Vidya Mandir. I am 12 years old, and my favourite food is Chow Mein. My favourite book is "The Naughtiest Girl." I like to chat with my friends and love playing basketball. Sometimes, I can be a bit naughty in class. In my family, there are five members, including one sister, one brother, mother, and father. I love my family very much. At school, I study science, maths, Hindi, English, and social studies. I also participate in various activities such as art, Odia, gardening, dance, and computer.

Shramdan

I participate in many activities such as kitchen, toilet cleaning, hostel cleaning, gardening, school cleaning, and girls' hostel cleaning. I particularly enjoy hostel cleaning and school cleaning because I like sweeping the floors. However, I don't like gardening much because I dislike pulling out weeds. In gardening, I prefer watering the plants and digging the soil. Cleaning toilets

and bathrooms is not my favourite, and I also don't like the kitchen activities except for adding water to the filters. I'm not fond of doing girls' hostel cleaning.

Yoga

In yoga, I practice various asanas like fish pose, camel pose, padmasan, surya namaskar, halasan, garadasan, chakra san, boat pose, headstand, and more. My favourite asana is doing padmasan and holding the toes. Although I'm not always on time, I enjoy doing yoga. I come for yoga every day and listen to the teacher, who corrects me when I do the asanas wrong. However, I'm not very regular in my yoga practice.

Science

I have a genuine interest in science due to the numerous experiments and fascinating topics it encompasses. Currently, I am studying the 8th-grade science book and have covered several chapters. These chapters include "Force and Pressure," "Friction," "Sound," "Some Natural Phenomena," "Chemical Effects of Electric Current," "Reflection of Light," and "Refraction and Dispersion of Light." In the chapter about friction, I delved into the concept of force, the causes of friction, and the disadvantages associated with it. I found this chapter particularly intriguing. The chapter on force and

pressure posed some challenges for me, but I persevered and did my best to grasp the material. The "Sound" chapter proved to be very engaging. I learned about the production and transmission of sound, as well as various topics related to sound, including tuning forks. I explored the characteristics of sound and gained insights into the human ear and its inner workings.

"Natural Phenomena" introduced me to the world of electric charge, lightning, and different types of charged bodies. I had the opportunity to conduct various activities, such as experimenting with a comb and pieces of paper to observe the attraction caused by electric charge. In the chapter on "Reflection of Light," I enjoyed creating ray diagrams for convex lenses and successfully completed the exercises. Additionally, I explored the human eye, its defects, and learned how to care for our eyes. Despite my enthusiasm for science, I sometimes find it challenging to maintain focus during class. Consequently, I may not always pay adequate attention when teachers ask questions. However, I must emphasize that science is my favourite subject, and I genuinely enjoy studying it.

Maths

I am currently in the 6th class of mathematics, and I enjoy working on this subject. I like mathematics because it comes

easily to me. I started with the number system, which I found easy. After that, I studied factors and multiples, whole numbers, integers, fractions, simplification, decimals, and algebraic expressions. My favourite chapter is the one I'm currently studying, "Linear Equation in One Variable," which I also find easy. I perform well on tests, and I enjoy doing math with Mani Didi, who teaches it nicely.

Hindi

I enjoy studying Hindi. I'm currently following the 8th book of Vasant. After finishing my book, I took a test and scored 49 out of 60. I've been studying the 5th grammar book, which I've just finished, and I'm now revising it. Sometimes, I feel a bit scared to ask questions to my teachers.

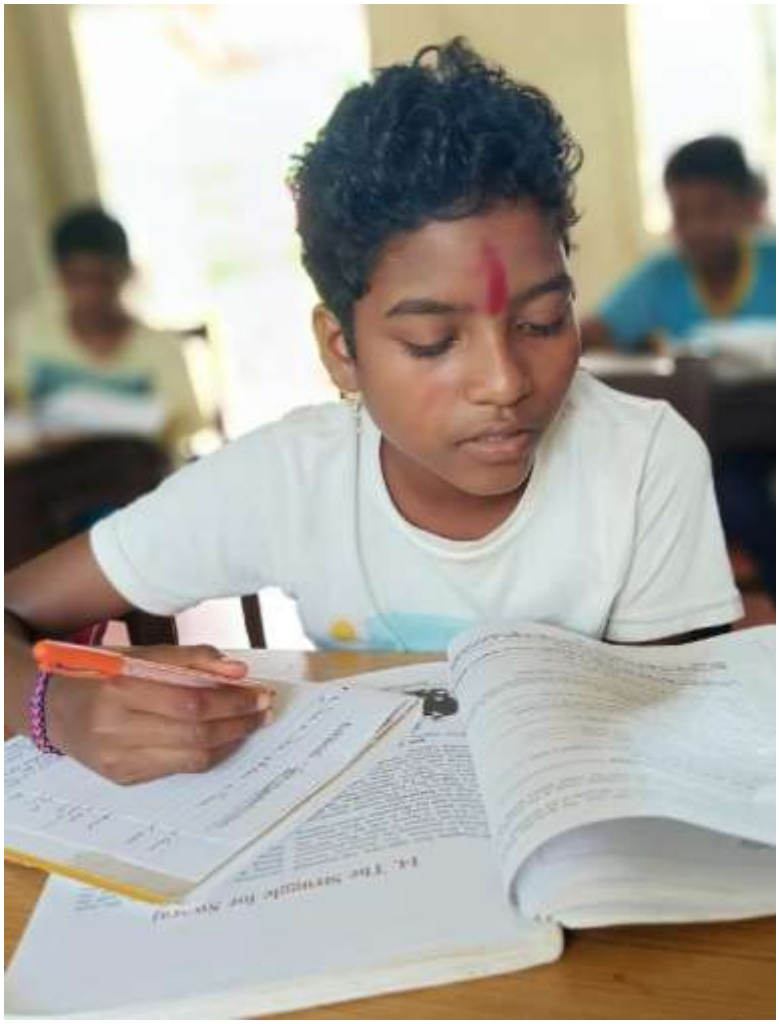
In class, we engage in various activities, including story writing, sometimes copywriting, dictation, and sentence writing. I particularly enjoy copywriting. My spelling in dictation is good. For story writing, our teacher dictates a story, and I write it down. I also do free reading, where I read books like the Panchatantra, novels, and Amar Chitra Katha. In group reading, I find it interesting sometimes and a bit boring at other times. I consider myself a fast reader.

We also study grammar, where we learn about pronouns, nouns, verbs, adjectives, and more. I participated in a skit for Chachaji's birthday. I enjoy writing in Hindi because my

handwriting is good. Whenever I have questions or want to understand stories and poems better, I visit my teachers. Overall, I really like studying Hindi.

English

I enjoy my English class where I engage in various activities like free reading, group reading, essay writing, message writing, notice writing, and communication. In my free reading time, I read books issued to me or books from the library, such as Panchatantra, novels, and Amar Chitra Katha. I've even completed the 4th book of communication in English. I found it relatively easy because I discussed it with my teacher orally. I took the test and received good marks. I'm quite skilled at dictations, but I'm not particularly interested in grammar as I find it difficult.



Social science

I like my social science classes. Right now I am in class eight. I started this book in March. In history I am doing the National Movement. I like studying but I don’t like giving the tests. Though I understand my performance has to improve. I also participated in a play on the school's birthday called "The Three Trees," where I played the character of the tallest tree. I enjoyed my role and even created beautiful props for my character. I also sang a song on

Janmashtami, "*Piya Tose Lagaa Jo Ye Man*," which I liked a lot. I've learned other songs like "The Trees of Green" and "Wavin' Flag."

On August 15th, I performed in a play about the freedom movement. I played the character of Gopal Krishna Gokhle, which was challenging due to the difficult lines. I felt nervous while performing but tried my best and did well In English class, I've learned some poems by Sri Aurobindo, including "Invitation," "Tree," "Surrender," and others. However, I realize I haven't improved my English-speaking skills because I don't use English in my conversations. I've also read a few books like "Magic Temple" and "The Blue Umbrella." Currently, I'm reading "How I Taught My Grandmother to Read." I also practise essay, message, and notice writing, although I find it difficult as I sometimes don't pay full attention in class. Occasionally, I play spelling games to improve my spelling skills.

Odia

I read some books like "Manapabana," "Sishu Bahi," and others. Sometimes, I enjoy Odia class, but at other times, not so much. In Odia class, I also learn some songs for programs like "[Suro De Taalo De]." Surekha Didi teaches me Odia class, and she teaches me nicely. Sometimes, she makes me watch some movies. She also scolds me when I don't speak in Odia, but she helps me improve my Odia speaking skills.

Music

I learn many raags, and in music class, I play the harmonium. I particularly like playing sargams. In music class, I have learned a sargam - S R G M P D N S - S N D P M G R S - N R G R G M P R N R S. I enjoy my music class and learn it carefully. I have a great time doing it with Surekha Didi.

Dance

In dance class, I learn various dances, including Goa dance and Ganesha's dance. I enjoy these classes and find them easy to follow. I like dance class, although my interest varies from time to time. For Krishna Janmashtami, I performed a dance to the song "[Raat Suhani]," which I enjoyed. I have dance classes on Saturdays, and I particularly like modern dances.

Art

I enjoy art class, where I work on various activities such as stencil, paper folding, painting, drawing, and more. I do art class with Suparna Didi and Brishti, and we recently made fish, oar, and

baskets with a new teacher, Lakshmi Didi, which I enjoyed. I'm currently learning how to do stencil.

Computer

In computer class, I work on typing and sometimes find it a bit boring. I also do painting and have learned how to print. Lalu Bhaiya teaches the computer class, and he is serious about it. I've learned to type ASDFJKL; R U E I, and I'm currently learning more.

Games

I enjoy playing games, including basketball, football, volleyball, and fun games. I particularly like playing frisbee. In games, I also do exercises and run a lot. I want to improve my volleyball and frisbee skills, as well as my running and sit-ups.

Meditation

In meditation, I sing songs and enjoy this activity. Sometimes, I get distracted by my friends. I participate in meditation with many didis and also learn songs with them, which I enjoy.

Celebration

I have participated in various events and performances, including a Goa dance on July 5th, a play on the freedom movement on August 15th (where I played the character Gopal Krishna Gokhale), and a dance performance on Janmashtami. I also sang the song "Piya Tose." I enjoy performing dances, songs, and plays and find it a fulfilling experience.
