

My Report by Lakshya Jani

2021-22

DOB- 26th May'07

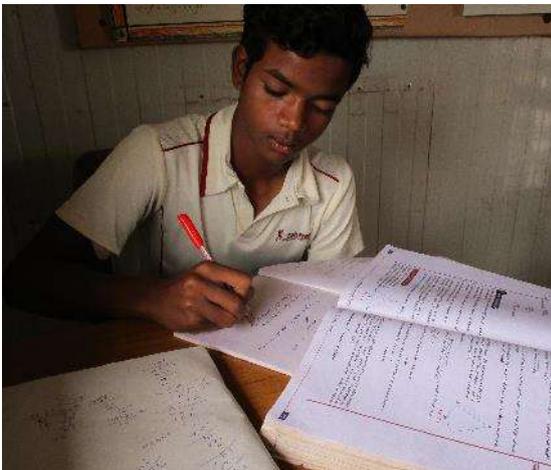

I am Lakshya. I would be appearing my 10th class exam in April'22. As I was revising for my exams, I loved doing Math because this was the easiest subject for me. I got lots of practise in Mathematics. I like to play football and basketball.

Math

I am doing the class 10 book by R S Aggarwal in Mathematics. I really liked that book. I would take a test after finishing each chapter and did well on the tests.

After I finished the RS Aggarwal book, I started with my original course- NIOS Mathematics. I completed the NIOS book in less than 5 months. But my exams, were still very far so I started another mathematics book of CBSE which I was unable to complete before the exam.

Then I started revising my NIOS course. I loved to revise. I also practised many previous years' question papers. Srinath bhaiya gave me the whole book test. He gave us three papers of 85 marks. In these three papers, I worked to get full marks but scored one mark less than 85. I have decided to pursue math in further studies.

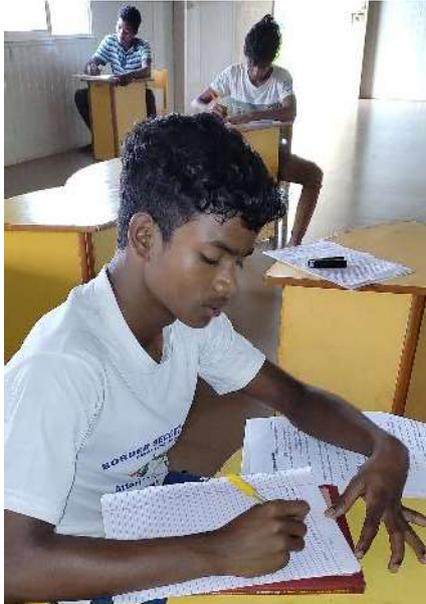

Science and Technology

I am doing the 10th class syllabus in Science and Technology. We started doing the Chemistry part first. After finishing one chapter, we made notes and did the questions of the chapter. We then gave a test from the chapter. After Chemistry we did the Physics portion. Lastly, we completed the Biology chapters. After completing the course, we went for a test from the

Chemistry section, which was of 50 marks. Then we gave a Physics test. I got good marks in both the tests. Meeta (Bisen) didi had come to our school for a few days in the midterm. She taught us Chemistry and some chapters of Physics and Biology. All the tough chapters we did with Meeta didi. I enjoyed studying with Meeta didi. Neha (Aghi) didi had also come to kechla. She taught me the chapter of Cell Theory in Biology. I had my exams coming up in April, so I started revising for the exams. I thoroughly revised all the chapters.

English

I was doing my NIOS course last year. We read the stories of our course. We practised writing work and grammar in the class. Everyday our teacher gave us letters and messages to write in the class. After studying each chapter, we would do the question answers of the chapter and then would take a test. The tests were very simple and I could answer all the questions. Sometimes in the class I felt very lazy to write as the class was in the afternoon. Before exams started, I did the previous year question papers. Didi also gave a practise test paper of 100 marks. I could do the questions. When our exam approached, I spent more time in grammar and writing. I did all the questions. I found it very easy.

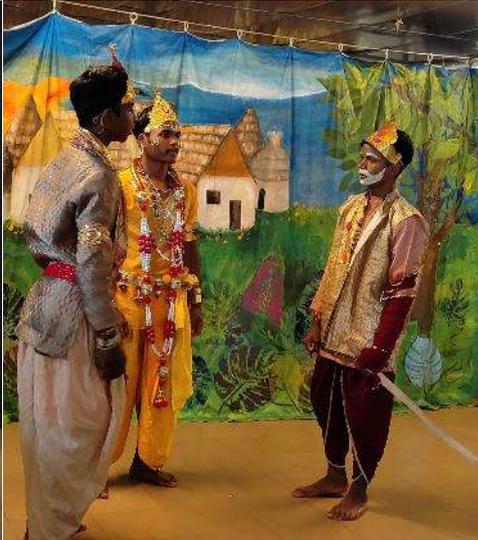

Social Science

I am doing the 10th class Social Science. The most difficult chapters were of Political Science. We did the question answers of these chapters and understood the difficult concepts. We also gave the test of the chapters. The easiest was Geography and then History. In the middle we also gave the whole book test of Geography. This was very easy and I scored well in the test. Then we gave the whole book test of History. Before the exams I went through all the chapters again. I had allocated different times for studying History, Geography and Political Science. I also practised previous year question papers so that I get to know the type of questions that come in the paper.

Hindi

In Hindi, I was doing the question answers from the NIOS course book. We did grammar. In grammar we did samas, types of sentences, idioms, synonyms and antonyms. I liked to learn the grammar. I also did letter writing and essay writing. I found it a little difficult to write essays. We gave a test from the whole book. I did very well in the test. I also practised many previous years' question papers.

Celebrations

Last year we celebrated many festivals and ceremonies in the school. In the previous years, due to Covid 19, we could not celebrate many festivals. But we celebrated the important days. On Republic Day we hoisted our national flag on the school ground. We also held a rally from the school to our hostel.

On 15th August, my group did a play on the life of Sri Aurobindo. I was the narrator in the play.

On Janmashtami we did a play on Krishna. I had taken the role of Akrur, Lord Krishna's Kaka. On Ganesh Chaturthi, I did a dance with the little children. There were many other celebrations such as our school's birthday and Christmas.

Shramdan

In shramdan, I go to the kitchen for cutting

vegetables, do toilet cleaning, gardening and our school cleaning. In gardening we cut grass,

ploughing the field and clean the grounds which is full of weeds. In school cleaning we clean the groups and the veranda of the school. On Sundays, we do our own room cleaning. When my exams approached, I stopped doing shramdan and would study at that time.

Games

I play football, basketball and volleyball in games time. When we go to the games field, we first do some exercises of the joints and then we take 20 rounds of the football field. After that we go to our respective corners. I love to play football and basketball. Due to my exams, I had stopped running and my stamina has reduced. Now I am trying to recover my stamina.
