Amrita Majhi

DOB- 18th June'16

Report for 2023-24 (First Term)

Attendance- 174 out of 183 days

Introduction

Six-year-old Amrita stays in the hostel and hails from a far-off village called Lenge Suku. She is a regular school-goer and always comes to school in a neat manner. While she occasionally drops food while eating, Amrita enjoys puri and noodles. Remarkably, she takes care of washing her clothes independently.

Projects

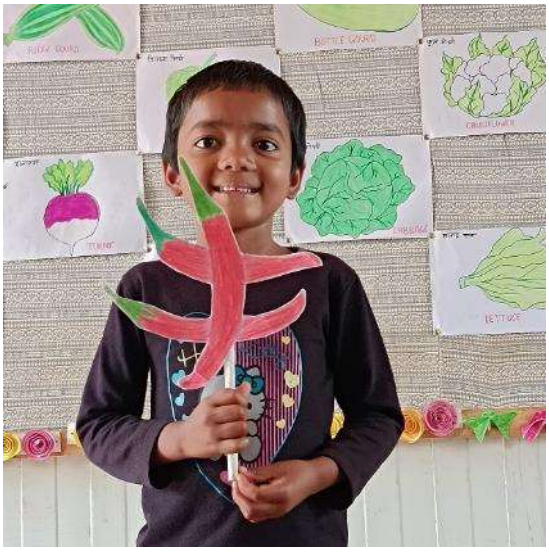
1. **Health and Hygiene:** Amrita created drawings related to cleanliness and actively contributed to the creation of a chart on health and hygiene. While she's made progress in understanding the topic, there's room for improvement in her cleanliness habits. She engaged in the hand washing activity and learned the necessary steps.

2. **My Family:** Amrita successfully created drawings of her family members and organized them on a family tree. She demonstrated an understanding of her family members and was able to identify how many family members she has. She

also enjoyed pasting the pictures on the family tree and learned some familial relationships. Additionally, she learned songs related to family.

3. **Me and Body Parts:** Amrita showed knowledge of various body parts, particularly in English. She created drawings of different body parts and took a keen interest in learning songs about body parts. She expanded her understanding by learning about the five senses and even tasted different items like herbs, onions, and bitter gourd.

4. **Shapes:** Amrita was a fast learner and actively engaged in activities related to shapes. She exhibited a strong understanding of shape names and properties, recognizing both 2D and 3D shapes.



5. **Vegetables:** Amrita displayed her artistic skills by drawing pictures of vegetables independently. She's familiar with most vegetable names in English. She confidently spoke about vegetables like chili in English, and she participated in riddle activities related to vegetables. Amrita also created a chili model with clay, indicating her enthusiasm for working with this medium. While she has learned about root and plant vegetables, there's room for further growth in her knowledge.

Amrita's project report highlights her engagement in various learning topics and showcases her willingness to participate in practical activities and creative tasks. Her progress in understanding family relationships, body parts, and vegetables is evident. Her continued participation and enthusiasm for learning are commendable.

English

Amrita actively tries to speak in English. She demonstrates a good understanding of the language and can effectively respond to the teacher's questions. She excels in memorizing dialogues, even lengthy ones. In the dramas "Kuber and Ganesha" and "The Mice Wedding," she portrayed significant roles, such as the wife and the lead role of Ms. Mouse, respectively. Her performance was notable, particularly considering her ability to remember and deliver long dialogues. Amrita also has a talent for singing, with a good grasp of pronunciation. She remains attentive during class and shows a keen interest in stories, which she can retell in Hindi.

Hindi

Amrita enjoys listening to stories shared by the teachers and attentively responds when questions are posed. Occasionally, she engages in drawing and attempts to create her own stories. She has successfully learned the names of shapes, vegetables, and colours, demonstrating ease with colour names but requiring a bit more time for others. In terms of the Hindi alphabet, Amrita is proficient in recognizing vowels (*swar*). Yet, grasping consonants like *ka, kha, ga,* and *gha* presents some pronunciation challenges. Despite these hurdles, she remains dedicated and works diligently to overcome the difficulties.

Maths

Amrita is a highly intelligent and quick learner who doesn't require much time to understand new concepts. She is attentive in class and excels in addition, whether it's one digit by one digit, two digits by one digit, or two digits by two digits, both with and without objects. She quickly adapted to addition with carrying because she had a strong foundation in one-

digit addition. She is exceptionally fast in mental addition and can solve problems quickly by visualizing objects. She also has experience with subtraction, initially for numbers up to twenty, and later for larger numbers without carrying. She is proficient in solving addition and subtraction word problems. She has a solid understanding of more than and less than comparisons and is skilled at identifying numbers that come before, after, and between other numbers. Additionally, Amrita is adept at skip counting, particularly by twos and threes, both with objects and mentally.

Arts

Amrita enjoys art class, especially when it involves creating imaginative drawings. She consistently produces beautiful pictures and approaches activities with enthusiasm. Her colouring and paper folding skills are commendable, and she can independently create various items during paper folding exercises.

Dance

Amrita prefers dancing with her friends and is shy to dance alone. However, she can dance properly and is particularly fond of Pahadi songs. She attempts to create her dance steps when teachers encourage creativity.

Games

Amrita usually pays attention but can sometimes become naughty. When she's not in the mood for the game, she tends to get distracted, fiddles with her clot hing, and engages in conversations with her friends.
