Ajay Krisani

DOB- 15- December 2010

Report of 2023-24 (first term)

Attendance- 183 out of 183 days

Introduction

My name is Ajay, and I study at AMVM. I am 12 years old.

Science

In my science class, I have been studying alongside Jagat Bhaiya and Ambika Didi. Currently, we have completed the 7th book and have commenced our studies from the 8th book. I have successfully covered 16 chapters, and overall, I found them to be manageable and not too difficult to study. One chapter that I particularly enjoyed was "Pressure." This chapter not only piqued my interest but was also

relatively easy for me to grasp. We engaged in various activities related to this chapter, which made the learning experience enjoyable.

The chapter on "Force," however, presented some challenges for me. I found it a bit more difficult because, at times, I wasn't fully attentive when Bhaiya was explaining the concepts to the class. One of my favourite chapters was "Chemical Effects of Electric Current." I had the opportunity to conduct experiments involving wires and electric gadgets, which I thoroughly enjoyed. These hands-on activities added an extra layer of excitement to my learning. Currently, we are delving into the chapter on "Refraction and Dispersion of Light." I must admit that my attention has waned during this chapter, and I find myself a bit confused with certain new words and definitions. To overcome this, I realize the need to focus more during class and avoid daydreaming. On a positive note, I actively participate in group discussions whenever they occur.

Maths

In maths class, I study with Mani didi, and I'm currently working on the 6th-grade book. I was studying the chapter on parallel lines, but when

Pranjal bhaiya asked if I wanted to go back to clear my doubts, I agreed and quickly completed 8 chapters. I found simplification quite easy, which resulted in a good score on the test. Occasionally, I doze off in class, and when I find the subject boring, I chat with my friends.

Hindi

In April, I was studying the 1st chapter of Basant Bhag 2. I initially didn't score well on the test for this chapter, but I retook the test and improved my score. On Chachaji's birthday, I entertained my friends with skits that I had learnt from my teacher. While performing these skits, I experienced a bit of stage fright, but I managed to perform them fluently. Sometimes in class, when I get bored, I pretend to sleep, and when the teacher scolds me, I act as if I'm studying. I dislike doing dictation because my spelling is not very good.

English

I study with Kamli didi. During the class, I engage in grammar, self-study, and dictation. I particularly enjoy grammar and self-study, which has led me to complete many books through my diligent studying. Now, I make the most of my time by reading books I

love. I've finished the first book of Eragon and am currently reading the second book, Eldest. I completed the communication book quickly and easily and even performed a drama titled "The Three Trees" to celebrate. I played the role of a tree and created a tree prop using cardboard and bamboo sticks. The dialogues were easy to remember. I also sang a Krishna song during this celebration. I love dictation and consistently score well in it. We've started reading R.K. Narayan's book, "Swami and His Friends," and I've noticed an improvement in my speaking skills in English.

Social science

VI study social science with Bhavna didi and Gauri didi, I have started the 8th book of Ratna Sagar. In History I have completed 16 chapters. And in geography 8 chapters. I participate in all the classroom activities. Many time I get distracted by things going outside the classroom. I do all my questions answers on time referring to the

books because I find some questions difficult to answer. I have a beautiful handwriting and didi praises on my writing skills.

Odia

I study the Odia language with Papaji and am currently working on the 1st book of Odia. At the beginning, I found it challenging to understand Odia paragraphs and words, but now I can read them more easily. However, I still get a bit confused with the symbols.

Arts

I have art class with Brishti didi and Suparna didi. During these classes, I engage in various activities like painting, drawing, and more. Currently, I am learning how to create stencils. I am getting better at it, although I still have room for improvement, and I believe I can become more skilled with more practice.

Dance

I attend dance class with Brishti, Gauri, and Suparna didi. In this class, we learn various types of dances. During Ganesh Chaturthi, I performed a Ganesha dance to the song "Deva Shree Ganesha." I enjoyed

it because I did it with my friends. Currently, I am learning a Bhangra dance, which I love because the steps are easy to learn and remember.

Computer

I take computer class with Lalu bhaiya, where we work on typing, painting, and other activities. After practicing typing for two months, I took a test to check my typing speed, and it improved to a range of 16-24 words per minute. In painting, I am still working on improving my drawing skills, and I hope to become better with more practice.

Music

I have music class with Hari bhaiya, where I play the flute. I have learned to play sargam and the music of "Achutam Keshavam," and nothing else. I enjoy the class with Hari bhaiya because he teaches me very nicely.

Games

During game time, I play basketball, football, and volleyball. My favourite game is football, followed by volleyball and basketball. I don't even know why I love football so

much. In football, I enjoy playing as a defender or midfielder. In volleyball, I like playing in the middle, but the older kids sometimes don't let me because I might accidentally hit the ball out of the field.

Shramdaan

In the morning, I participate in Shramdan activities like cleaning toilets, girls' and boys' hostels, school premises, kitchen, and gardening. I enjoy working in the kitchen, especially when I get to cut potatoes. During toilet cleaning, I wash basins, toilets, and more. In the girls' hostel cleaning, I help with pulling out weeds in the garden, while in the boys' hostel cleaning, I perform sweeping and mopping in the dining hall and at tables. I also enjoy digging in the garden and participating in school cleaning by sweeping the entire school premises.

Yogasan

In the morning, I do yoga with Suman bhaiya. We practice various asanas like Paschim Uttanasana, Halasana, Ardha Chandrasana, Surya Namaskar, Birsasana, Boat Pose, Camel Pose, Gaumukhasana, and more. Sometimes, I don't feel like doing it, so I skip it, but I usually attend regularly.
