Lita Gouda

DOB- 27th March'18

Attendance- 164 out of 183 days

Report for 2023-24 (First Term)

Introduction

Lita is a regular student, although she occasionally takes holidays due to being a home-sick child. She walks to school, so she tends to arrive a little late. When she does get to school, she enjoys decorating flowers for her mother. Lita brushes her teeth and takes a bath at school. If her clothes are dirty, she changes into clean ones. She is known for being friendly and has no trouble eating all the vegetables served in the school hostel. Moreover, she consistently finishes her meals.

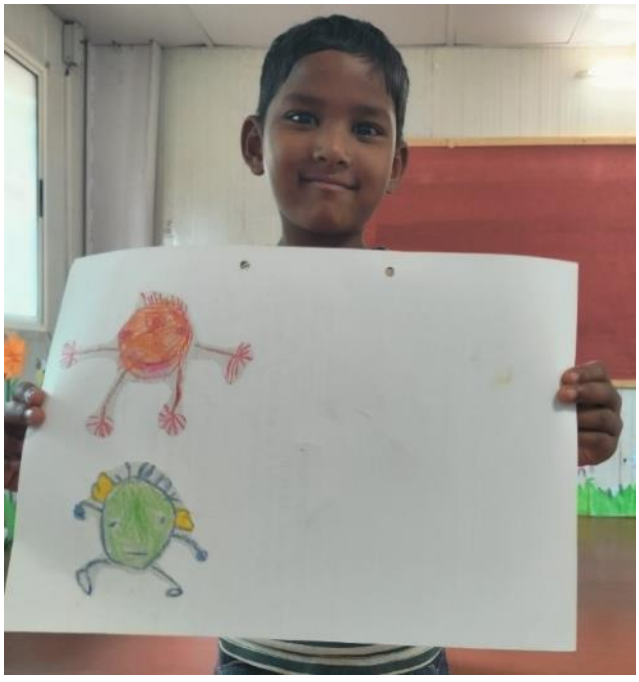
Circle Time

During circle time, Lita sits nicely with closed eyes and chants all the mantras, remembering each one taught in the group. Her voice is soft and she likes singing songs with actions, which allows her voice to open up. She particularly enjoys songs and rhymes and, on occasion, takes the lead during singing time.

Languages

Hindi

In terms of language, Lita enjoys listening to stories from picture books. When listening to stories from Diya, she pays close attention and retains the details of the story. She can even retell the same story using pictures. Occasionally, she tells her creative stories within 10 lines, accompanying them with drawings inspired by her surroundings. In the "Myself" topic, she learned to introduce herself in full sentences and created a book about herself, presenting it to the Unity group. She can provide information about herself in 5 to 7 lines in Hindi. In the "Body Parts" topic, she learned the names of external body parts in Hindi, their functions, and how to care for them. She created paintings and drawings of her body parts and provided 3 to 4 lines of information about each one. She also helped create a creative song about body parts in a group activity, which was presented on stage on July 5th. In the "My Family" topic, she drew pictures of her family members and shared information about her family and their relationships. **English**



Lita is able to understand the instructions given in the class. She is there in the class with a sweet smile on her face. She can pick up the words of the rhymes taught in the class. She loves singing various types of rhymes in the class with her friends. She shows interest while listening to any kind of stories through picture books and most of the time puppets are used to tell the stories. She heard a story of a thirsty crow in which puppets of a crow and sun were made and some of the objects were also used like pot, pebbles

and water to narrate this story. She also drew a picture of the same story and tried narrating it by herself.

In the topic ‘my body’ she learnt the names of her external body parts. She learnt the names through a chart paper of body parts. After some repetition she learnt the names properly.

In the topic on ‘myself’, she learnt how to speak her name in full sentence, her age, her favourite colour and things, etc. She drew her pictures and then didis cut it for her and then made a book out of it.

In the topic of ‘my family’ she learnt the names of her parents, their occupation and how many members are there in her family. She also learnt a rhyme of my family. She was told stories of my family.

Mathematics

Lita prefers to learn through practical, real-life experiences. She observes patterns in nature, which has helped her learn about colour names, shapes, sizes, loud and soft sounds, long and short, big and small, biggest

and smallest, and how to arrange objects in ascending and descending order. She begins her journey with numbers through games and various objects. She can observe patterns with beads and tell numbers without physically touching them. Lita can now count forwards and backwards in sequence up to 100 and can

identify after and before numbers up to 20. She can represent and recognize numbers without touching the beads on a ganitmala and is proficient in skip counting by 2 up to 50. When faced with word problems, she can silently

calculate and provide answers without the need for physical objects. Additionally, she can perform single-digit addition without using objects and can break down numbers by tens.

Skills work

She enjoys drawing in art class, particularly garden scenes. She takes care not to dirty the paper while colouring. In paper folding,

she creates airplanes and houses. Like some others, she occasionally needs help from teachers.

Celebrations

Lita enjoys participating in celebrations, particularly in dramas. During practise sessions, she performs very nicely. However, when on stage, she may feel shy about the audience. She takes pleasure in dressing up and painting her face. Her notable performances include a melodrama about body parts with her group on July 5th, a dance to "Sri Aurobindo Name Anando" on August 15th, celebrating Raksha Bandhan at school on August 30th, performing a dance for Janmashtami to "Adharm Madhuram" on September 7th, and dancing to "O My Friend Ganesha" on September 19th for Ganesh Puja.

Games

Lita is a diligent girl who arrives early at school and completes rounds without getting tired. Her favourite games are "apple-apple banana," "wolf and sheep," and "bat and ball." She also enjoys practicing yoga.
