

Kumari Gouda

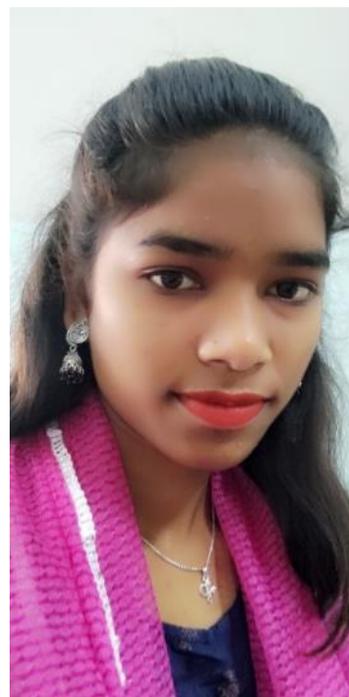

DOB-27-May-06

Report for 2022-23 (First Term)

My name is Kumari Gouda and I am 16 years old. I am studying in class 12th. I have opted for Science as my stream. The subjects which I have taken are: Physics, Chemistry, Biology, English and Physical Education. I would be appearing for my exams in April '23. Sometimes when I am bored, I like to do creative writing which is fun. It's nice that I am getting an opportunity to write about myself.

Physics

During class 10th, I used to like Physics very much and now also I enjoy it very much. I have completed all the chapters from the first book and from the second book I have completed three or four chapters. Also, I have completed the intext questions and terminal questions of these chapters. I am studying this subject online with Prakash Verma Sir. He is a good teacher, and he explains everything so clearly and in detail. Whenever I ask any question, he answers all of them very nicely. He makes us practise a lot of numerical problems. Sometimes when I don't understand any numerical, he helps us with that problem. After that it really becomes easy for me to solve it. The ones in which I am interested, I try to put my best effort and try to solve it by myself. I really love to study Physics with Prakash Verma Sir. I am putting my full efforts in this subject, because I want to be good in it.

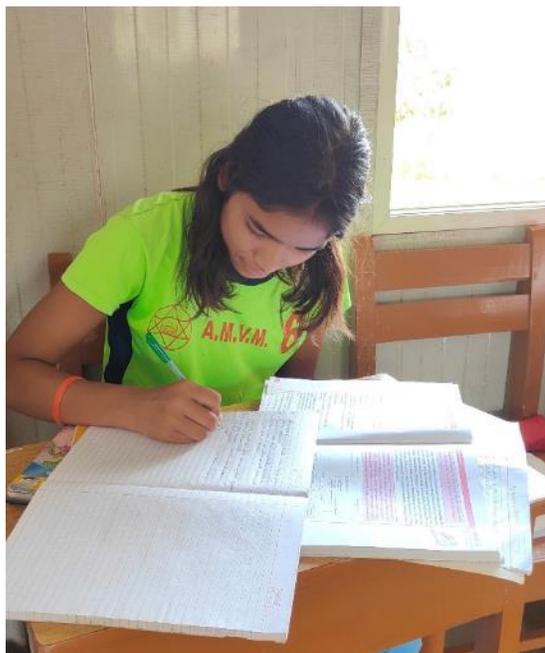

Chemistry

This subject is a little hard for me, but when I understand the topic, I am able to experience the essence of Chemistry. In the beginning, I used to study with Meeta di; she came to Kechla thrice for us, but we could not please her, so she left and stopped teaching us. Nevertheless, I did not let this affect me and I was studying by myself and then Pranjalbhaiya introduced us to a new teacher. Now, I am studying with Nidhi Dang Madam online - she is an excellent teacher and is always polite and helpful to me. Studying

with her is nice - she is never angry at us because we do all the homework she gives us and she helps us in even the smallest difficulties. With her, I can do almost all the problems without anybody's help. In fact, now I find the subject so easy that rarely I have any questions to ask her. I had never thought that I would be studying with experienced teachers but after studying with these teachers, I realise how hard one needs to study to be good. In August, Meetadidi had come to Kechla and we solved the previous years' questions with her. I am now preparing for my exams.

Biology

Earlier, I used to hate this subject, but now it is my favourite subject. This is because during my 10th class, I did not have any teacher to teach me Biology and I used to find it strange. But now I really love attending this class. I have completed all the chapters in this subject. It is very interesting to study about plants, animals, about how organisms were born on the earth, the human body and about the work each part of our body does. From the beginning in class 12th, I am studying this subject online with Shailja Bansal Madam. She is an excellent teacher; when she asks us questions and when I am able to answer it, she is very happy but when I am not able to answer a question, she gets a bit irritated and scolds me and tries to explain us the whole thing again. Still, it is so much fun to search for the answers and write them in the notebook. In this way I have finished all chapters with both the intext questions and terminal exercises. I am putting my whole effort in studying this subject because I want to do well. It is actually the most interesting subject and only because of this subject I have taken an interest in Chemistry. I am preparing for my upcoming exams, and I am trying my best. Nowadays, as we have finished the book, Didi sends us questions on the chapters - I attempt all the questions and send them back to Didi to check. I am also solving the previous years' question papers.

English and Physical Education

I have not started English and Physical Education because I am giving the exams for these subjects later next year. I am doing the difficult subjects first and the easier ones later.

I like to read a lot of books and it is my hobby. I mostly like to read adventure stories and detective novels. I have read many Agatha Christie's and now I am reading Jane Austen. I really love to read these types of novels. While reading, I am lost in the world of the book and don't pay any attention to anybody around me.

Celebrations

On *Ganesh Chaturthi*, I did a dance on Ganeshji's song. I was feeling very uncomfortable because I had not danced for many years.

I do not participate in many activities because of my studies and in most of them I am only an audience.

Shramdaan

I go for shramdaan at 6:30 a.m. in the morning. I do toilet cleaning, hostel cleaning, gardening and kitchen work. It's nice making the place clean and nice.

Games

My favourite pastime is sports and I like to play different games. Nowadays, I play basketball, frisbee, volleyball and once a week I have games with the youngest team of our school. I like to play basketball, and I have improved quite a lot in this game. I do exercises before starting the games.

Dance

In July, a film shooting team had come to our school and I had participated in a dance which my friends had presented for them. It was an enjoyable experience and I loved it very much. We had started the dance at 5pm and we finished at 7pm. It was more fun because I was dancing after many days.

Assembly

Like everybody I also like to do meditation and sing songs with everyone. Nowadays, I only attend the day on which we have assembly. On this day, we sing songs and the children show some plays which they have practised. In the last assembly, Sangita didi had a talk with the children.
