

# Shweta Krisani

DOB-06-Sep-16

Report for 2022-23

(First Term)

Shweta is a cute and silent child. Every day she comes to school happily. She never cries in the school. She talks very little in the group and freely talks to her friends when she is outside or goes for a walk. She is so silent in the group that she never expresses her feelings with the didis. She doesn't share whether she feels hungry, or needs to use the washroom or anything. When everybody goes to the toilet and asks her to come along, she does not respond and sits silently in the group. She is very possessive towards her own things. When she comes in dirty clothes and is given clean clothes to change into, she does not accept it. She wants to live in her own world without interference from others.

## Chanting

She sits in the circle with closed eyes in a meditative posture. But chants the mantras very rarely. When she is addressed again and again she speaks few words. Her participation in singing is also very limited but she does the actions nicely with everybody.

### *Drawing*

She has a good sense of colour. Her fine motor skill is well developed. She colours beautifully. She loves to use bright colours such as orange, red and blue. She always completes her work with patience. But when she is given freehand drawing she sits quietly.

### *Dance*

English music and songs are completely new for her and it is very difficult for her to express any movements with those music. Sometimes she does some actions by observing the didis' dance. But when she is given any free dance with soothing music she moves with the music.

## *Games*

She likes to participate in games and exercises like running, jumping, joint exercises. She does everything properly. She enjoys the fun games also.

## *Mathematics*

Shweta is an intelligent girl. She pays attention in the class. She has learnt counting till 20. When she does counting with objects, she always tries not to play with them, but she can't control herself and starts playing. She likes to do the maths activities in the math class.

## *Movies*

After watching two or three rhymes she finds it difficult to concentrate further. She roams around. And if she is again asked to sit, she lies down.

Now Shweta is taking time to recognise Hindi and English. She has learnt Hindi a little and she tries to talk in Hindi to everybody. But soon she will be acquainted with it and will speak fluently.
