Chandra Muduli

REPORT for 2023-24 (First term)

DOB- 19th March'09

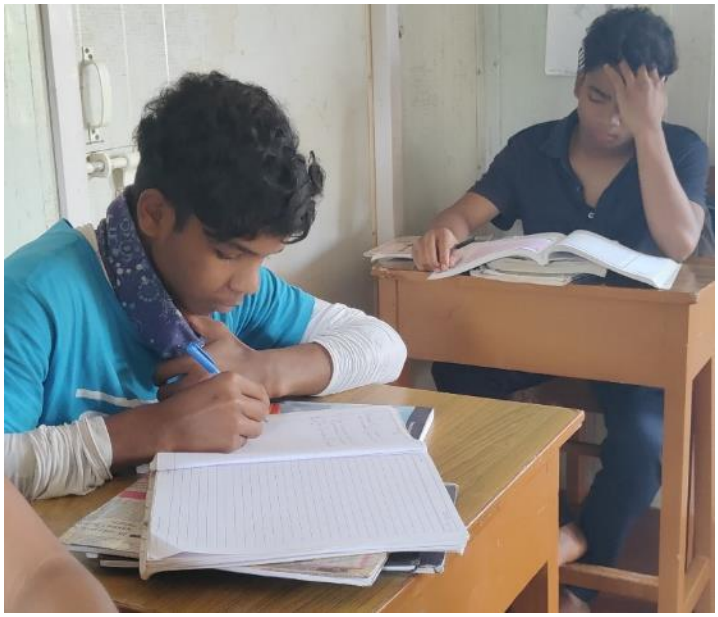
Attendance- 183 out of 183 days

INTRODUCTION:

I am Chandra Muduli, a 14-year-old student in the 10th class at Auro-Mira Vidya Mandir. I have a family with two brothers and two sisters, and I am the eldest. I enjoy playing football and volleyball and have a fondness for puri, a favourite food. In my free time, I enjoy listening to my sister.

ENGLISH:

In English, I've successfully completed both the 1st and 2nd courses. I gave whole book tests and performed well. The chapters were easy for me to understand. I also took chapter-wise tests for these courses. English class also involves grammar, where I've covered topics like nouns, verbs, active and passive voice, and more. I have learned how to write messages, letters, and notices. In class, I participate in group and self-reading. I mostly enjoy reading books like 'Eragon,' 'Samurai,' and 'Archery,' among others.



HINDI:

In Hindi, I've completed both the 1st and 2nd NIOS books. I confidently took the 1st book test and performed well, feeling unburdened by nerves. I also completed the 2nd book test. I am currently preparing for my exams. In Hindi class, I engage in grammar, covering paragraph writing and more. I also read Sanskrit and enjoy reading books. When I encounter unfamiliar words, I ask for clarification from my teacher. My reading skills are good, but I face some difficulty with specific words, which I work on. Group reading is another activity I participate in, and I write stories from books to improve my handwriting, which is already quite good.

MATHS:

In Mathematics, I've started with the 1st book of NIOS and have completed the first four chapters. I gave the 1st chapter test and performed well, as the concepts were

easy for me to grasp. I particularly enjoy math, and my favourite chapter is [Chapter Name].

SOCIAL SCIENCE:

I have successfully completed both the 10th NIOS books. Currently, I am studying political science and have started the 1st chapter of the 10th CBSE book from Ratna Sagar. I have a keen interest in geography, especially topics related to agriculture, weather, and soil. I also studied the Ratna Sagar book, delving into subjects like Indian agriculture and soil types like black soil, red soil, alluvial soil, and more. Civics is another area of study I enjoy, as it helps me understand the societal structure in India. I also watch videos that provide insights into geography and government topics.

SCIENCE:

I've successfully completed both 10th class NIOS books. I particularly enjoy physics and even completed the 9th-grade CBSE book with Prakash Bhaiya. I am currently working through the 10th CBSE book, and we have studied the first chapter on electricity. Physics allows me to engage in practical activities, such as drawing circuit diagrams and understanding

AC and DC motors. The science class covers three branches: Physics, Chemistry, and Biology.

I. **PHYSICS:** In Physics, I have already finished the 10th class NIOS book and the 9th-grade CBSE book. I performed well in chapter-wise tests, although I found certain theories a bit challenging. Physics interests me as it helps me understand various scientific phenomena and how to calculate distances and heights accurately.

II. **CHEMISTRY:** For Chemistry, I am studying the 9th-grade CBSE book, as I have experiments and activities.

III. **BIOLOGY:** I have created 3D models related to biology, such as the human body and ant colonies. The human body model includes a circulatory system diagram with colourful detailing. In our ant colony project, we observed ant behaviour and provided food for them.

YOGASANA:

Yogasana is an activity I enjoy, as it increases my flexibility. I engage in various asanas like Machhya Asana and Hala Asana. Additionally,

we attend theory classes with Suman Bhaiya to understand the principles and philosophy behind yogasana better.

ARTS:

Art class allows me to express my creativity through activities like drawing, paper folding, and creating hangings. I particularly enjoy painting, concentrating on colours and shading. Recently, we participated in a painting competition, and I focused on improving my shading techniques.

TUESDAY ACTIVITIES:

On Tuesdays, I participate in a wide range of activities, including math, painting, art, speech, English, Hindi, dance, and music. Among these, I find art and painting the most enjoyable, as they provide me with an opportunity to express my creativity.
