# Madhurika Gouda

## DOB- 26th October'16

## Report for 2023-24 (First Term)

## Attendance- 183 out of 183 days

## Introduction

Madhurika, aged seven, resides in the hostel with her sister Lavanya. She is a regular school attendee who comes to school neatly. Her best friend is Tapaswani, and she enjoys doing puzzles with her friends. Her preferred meal includes potato curry and puri, although she occasionally drops food while eating. Madhurika also has a liking for hearing stories and maintains a friendly disposition with her friends and teachers.

## Projects

1. Madhurika is an intelligent girl, and over the past few months, she has consistently demonstrated her capability in her studies. She initially focused on the topics of 'myself' and 'health and hygiene,' showing herself to be a quick and eager learner. Madhurika excels at answering questions during class discussions, and her curiosity drives her enthusiasm for learning.

2. **Health and Hygiene and Myself:** Madhurika learnt important aspects of personal hygiene, such as how to keep herself clean, how to use a toilet, and how to properly wash her hands. She also actively participated in creating a chart, drawing images of cleaning items and helping in its preparation.

3. **My Family:** She learnt the names of her family members and created pictures of them. Additionally, she constructed a family tree using these pictures and learnt about the occupations of each family member. Madhurika can also identify the number of family members in each family. She enjoys singing songs related to family and can provide details about her own family, including her sisters' names and their ages.

4. **Body Parts:** In this topic, Madhurika acquired knowledge about various body parts, their names, and their functions. She produced drawings and learnt songs related to these body parts. Her learning extended to understanding the five senses and their respective functions. She demonstrated an ability to answer questions about this topic, including a sensory perception activity involving tasting and smelling different vegetables and spices.

5. **Shapes:** Madhurika comprehensively learnt about shapes, from primary shapes to 3D shapes. She has a sharp memory and can name shapes, describing their properties. She also enjoys learning new songs related to these shapes and can confidently draw them without visual references.

6. **Vegetables**

Madhurika displayed her artistic skills by drawing various vegetables and recognized some of them in English. Her interest in clay modelling was highlighted when she made models of carrots and ladyfingers. She also engaged with other students by sharing riddles and information about vegetables.

## English

Madhurika is a quick learner who pays close attention when listening to stories. She tries to retell them in Hindi rather than English, using phrases. She has a good voice and quickly grasps the content. Madhurika is particularly interested

in singing, enjoys learning new songs, and has a strong vocabulary. She can recognize and name objects from pictures. In the drama, she played the lead role of Ganesh in "Kuber and Ganesh" and the lead role of Mr. Mouse in "The Mice Wedding." She had no hesitation delivering her lines during the performances.

## Hindi

Madhurika's intelligence and enthusiasm for learning stand out. She is active in both drawing and creating her stories. She eagerly listens to stories narrated by teachers, responding aptly to questions posed. Madhurika has successfully learned some of the alphabets, excelling in recognizing vowels (swar) and displaying proficiency in some consonants. While the pronunciation of complex sounds such as *ka, kha, ga,* and *gha* remains challenging, she persists in her efforts. She has fluently learned the names of shapes, vegetables, and colours, along with several poems, demonstrating her ability to memorize and recite them with clarity.

## Maths

Madhurika is very quick at learning maths, but she requires regular reinforcement; otherwise, she tends to forget the concepts. She is exceptionally smart and clever. Initially, she excelled in simple addition, including one digit by one digit and two digits by one digit. However, when she started learning the addition of two-digit numbers by two-digit numbers, she needed more concentration. She found addition without carrying quite simple, but when carrying numbers in two-digit addition came into play, she encountered some difficulty. She sometimes managed to work through it. Madhurika began by using physical objects to aid her in understanding

addition and then transitioned to mental calculations. She is proficient in adding with objects but occasionally encounters challenges when calculating mentally. At times, she simply copies answers from her peers without thinking. She has some knowledge of skip counting by twos and is good at identifying numbers that come before, after, and between other numbers, as well as distinguishing between larger and smaller numbers. She is also skilled at solving addition word problems. Madhurika has experience with both more than and less than comparisons, both with and without objects. She was also introduced to subtraction, initially confusing it with addition, but eventually, she grasped the concept.

## Arts

Madhurika excels in paper folding, consistently producing neat and beautiful folding. She has crafted a variety of items, including balls, boats, boxes, and double boats. Additionally, she enjoys drawing and showcases her talent in colouring. Her preferred subjects for drawing include flowers, houses, rivers, clouds, and more.

## Puzzles

Madhurika demonstrates her puzzle-solving skills with focus and determination. While she primarily works with friends, she can occasionally become distracted, especially when she feels bored. She effectively tackles puzzles with 100 and 150 pieces.

## Dance

Madhurika is highly enthusiastic about learning dances and enjoys dancing to music. She can dance well alone and quickly grasps dance steps. She learned "Vrindavan Mein Gopi Aaye" and performed it during Janmashtami.

## Games
