DOB- 23-Mar-11

Report for 2022-23 (first term)

Mathematics

I love studying mathematics. It has been just 3 days since I've started the 7th class book after completing the 6th class book and giving the whole book test. I enjoyed studying the chapters of 'Whole

numbers', 'Integers', 'Simplification', 'Line segments, rays and lines', 'Angles and their measurement', 'Parallel lines', 'Construction', 'Polygons', 'Triangles', 'Quadrilateral', 'Circles', and 'Concept of area and perimeter'.

I found all these chapters easy as I could understand and do the question and answers properly and easily. I found difficulty in the chapters of 'Algebraic Expression', 'Linear Equations' and 'Ratio and Proportion' as these were new to me. I still need practise in these chapters to be clearer. I study Mathematics with Basant Bhaiya and I enjoy studying with him.

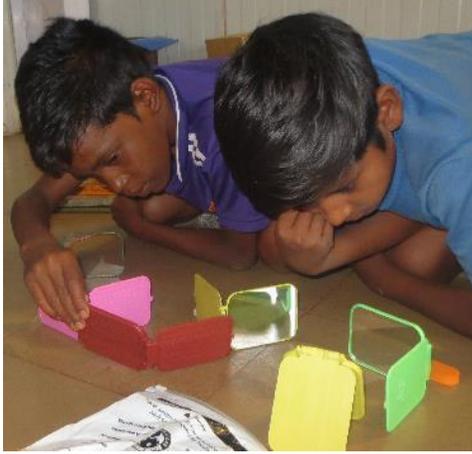

English

In the English class, we do free reading, group reading, Grammar, writing work and also do comprehension work from a book. For comprehension, I am studying from the 4th class book of Broadway. I read stories from this book and do the question answers given at the end of the chapter. I enjoy reading the stories as I understand them very well and therefore find it easy to do the question and answers. In Grammar, I'm doing from the 5th class book of 'Good Grammar'. I have learnt Nouns, Adjectives, Verbs, Adverbs and Sentences. In writing work, we do story writing, paragraph writing, and we do notice writing. Sometimes we also get dictation as a

writing work and love taking dictation. I like doing story writing the most. I need to improve my handwriting. The days we have free reading, we go to the library to read books of our own choices, so I love doing free reading. I also issue books from the library to read. Some of the books which I've issued and read are 'Wicked words', 'Around the world in eighty days' and 'Isaac Newton'.

Science

I'm doing the 7th class Science book of NCERT. Currently, I am doing the chapter of 'Time and Motion'. In this chapter I like to solve numerical. The chapters that are completed are 'Electricity', 'Cells' (batteries), etc. While studying about electricity, I made a home circuit, working bulbs and fans. After this I studied about batteries (cell) and electromagnets, electric bells and generation of electricity. We also learnt about wind energy and water energy. We gave a test on the chapter of 'Electricity' in which I scored 21 out of 30. I understand what is taught in the class and can answer when asked but need to improve my hand in making diagrams. I enjoy studying Science because we do lot of experiments and also it is very interesting. Jagat bhaiya and Ambika didi take our Science class.

Social science

I am studying Social Science of class 7. The chapters of History are completed. I studied about many kings and got many more information about our past. I understood all the chapters and could do the question and answers easily. In the tests I scored average marks in most of the chapters. During the class we also watched some Historical movies which I enjoyed a lot as I could understand better. Now we are studying Geography. The chapters are almost covered with 3 remaining. I enjoy studying Geography less as compared to History as I feel bored and sleepy. When didi shows videos related to the chapters, I understand better. We've watched videos of highways, sea routes, airways, and how humans transport goods and passengers, natural vegetation and wildlife and natural calamities, etc.

Odia

I study Odia from Papaji twice a week. I have learnt the alphabets and their matras. I can read, write and speak in Odia but need improvement in the pronunciation while speaking. In the class we read, write and listen to stories, play word games and also learn songs. I love to listen to stories because I get to know morals.

Hindi

I am doing the 5th class book of 'Rimjhim'. I love to read the stories and poems given in the book as I can understand them easily. I do the question answers without any problem. I find difficulty in understand the Grammar but once didi explains it to me, I am able to solve the Grammar questions easily. I love to do free reading as we get to read many different stories and also comic books like 'Panchatantra'. We also learn songs, poems and plays during the class. I need to pay more attention in my speaking and writing. Manisha didi takes our Hindi class and I enjoy her class.

Computer

We have computer class once a week with Lalu Bhaiya. In the class, we practise typing and learn drawing on the computer. Now I'm doing the 2nd course of typing and therefore need to practise more to increase my typing speed.

Art

We have art class once a week with Brishti didi and Suparna didi. In the class we make drawings and learn some crafts. I love to draw flowers, animals and vehicles although my hand is not

very good at drawing. In craft, we have made many things such as paper flowers and wall hangings. I enjoy learning arts and crafts.

Yogasana

We start our morning with yogasana at 6 o'clock. We do many asanas such as 'halasana', 'garudasana', 'paschimatasana', 'surya namaskaar', 'headstand', etc. I enjoy doing the different asanas as my body is becoming more flexible.

Shramdaan (Work Offering)

After yogasana, we go for shramdaan. We

do different activities on each day such as gardening, toilet cleaning, hostel cleaning, school cleaning and kitchen work. I love doing gardening and school cleaning the most. In gardening, we do digging, watering plants, and plant saplings of fruits, flowers and vegetables. In school cleaning, we sweep the paths of the school and clean the groups by sweeping and mopping. In the kitchen we cut vegetables for lunch and breakfast and fetch water from the handpump to fill the filters.

Games

At games time we do running, joint exercises and play various games. Before we start any game, I like to warm up my body by running and doing exercises. We play fun games, football, basketball and volleyball. My favourite games are football and volleyball.

Dance

We have dance class once a week and Suparna didi takes our class. We learn some folk dances and some form of contemporary dances like Jazz. We have also learnt Dura dance from Denis bhaiya, who had come for a short period. I generally enjoy less, doing and learning dances but I enjoyed learning and performing the Dura dance. We learnt and performed dances on some functions and occasions.

Celebrations

On July 5th which we celebrate as our school's birthday, our group had performed two Hindi plays. I had played the role of a 'brahmin' in one of the play. I performed well as I memorized the dialogues properly. I enjoyed

doing the play and learnt from the play that we should not discriminate people according to their castes and religion.

Trip

In August, along with my friends, I was out on a trip to South India. This was my first trip and we visited a few places in Tamil Nadu. For the first time I travelled by train and it was a great experience. We started the trip on 17th August. On the first day we took a train from Paliba and went to Simhachalam. We stayed the night in Simhachalam and visited the temple dedicated to Lord Vishnu the next morning. Then in the evening we took a train to Kanyakumari

and got off at the Nagercoil junction station. We stayed in Kanyakumari for two days and visited the 'Vivekanand Rock Memorial' and 'Gandhi Memorial'. We also went near the Indian Ocean to see the beautiful sunrise and sunset. From Kanyakumari, we went to Madurai. We camped there at Arvind Eye Hospital and visited the Meenakshi Temple and a museum. Then we travelled to Rameshwaram and Dhanushkodi. Our final destination was Pondicherry. We stayed there in the Ashram-Delhi House for 6 days. We visited the Samadhi of The Mother and Sri Aurobindo every day. We also went to the bakery of the Ashram. In Auroville, we visited the Matri Mandir. On the 2nd of September we reached back home safely. I enjoyed my trip very much and I was happy.

I want to attend more school trips.
