

Sasmita Bisoi

Annual Report for 2023-24 (Second Term)

DOB- 1st October'11

Annual Attendance 351 days out of 366 days

Introduction

My name is Sasmita Bisoi, and I study at Auro Mira Vidya Mandir. I am a very shy natured girl and like to study. I enjoy studying in this school as I have many friends here and they help me in my studies.

Science

I like attending the science class and the homework but sometimes I struggle to complete it when I have a lot. Even when I have time, I may not always complete my

science homework as I find it tough. But then I still try to attempt it and whenever I am unable to do so I turn to the teacher for help and she then explains the concept all over again. Whenever I have my doubts I question it to the teacher and get my answer. We do a lot of experiments during this class and enjoy doing it thoroughly.

Social Science

I enjoy social science class because our teacher teaches us well. I particularly like reading about the different kings and their dynasties during class. I always try to answer the questions asked by the teachers in full sentence. I am attentive in the class and listen to the teachers carefully. We are currently doing geography and I am finding it a little hard as we have to remember a lot. I face a lot of confusions but then have it cleared by the teacher.

English

I enjoy grammar and completing daily English homework assigned by our teacher. We do a lot of reading to improve our spellings and pronunciations. We are taught how to write the proper way of writing an answer. Lately, my friends and I have started talking

in English and in this way we encourage all the other students in the school to talk in English so that their English would improve.

Hindi

I like Hindi class because our teacher teaches us grammar and assigns us interesting book work. We do a lot of reading and lots of dictation is given to us to improve our spellings. I have improved my writing in Hindi as well as my spelling. But most of all I like attending the free reading sessions where we go to the library and take out books and read it ourselves.

Maths

I enjoy maths class because our teacher explains concepts well. However, if I don't understand something, I ask the teacher repeatedly until I grasp it. We are taught different methods to solve a sum and this I find it very interesting. We are given textbooks from where we attempt and solve the questions and have it checked from the teachers.

Computer

I enjoy typing and mastering typing skills in computer class. I like learning about computers. We are also taught how to use the computer and how to maintain a computer. We have computer classes once a week and I really look forward for this class as I find it very interesting.

Odia

In Odia class, I enjoy reading and writing stories. Our teacher teaches us how to read and write in Odia, and now I know how to do both. We are also told stories in Odia and whenever our teacher asks us questions related to the story, I am one of the first to answer the questions. My writing in Odia has improved and so has my pronunciations in Odia.

Games

In games, I like to play football and basketball because I enjoy playing with my team. My favourite game is basketball because it requires teamwork. I also enjoy playing base-kickball for physical activity. Every day, I play different games because I don't like playing the same game every day. I also enjoy doing exercises during games.

Shramdan

During shramdan, I enjoy sweeping the hostel campus very much as I don't like to see our hostel campus dirty and untidy. Every day, I participate in various shramdan activities such as gardening, school cleaning, hostel cleaning, and more. I also go to the kitchen at six in the morning to cut vegetables for the breakfast. I always try to be punctual and do the work assigned to me sincerely.

Flute

I am learning to play flute in the music class. I enjoy playing the flute and attending flute class. In flute class, I learn notes like s, r, g, m, and more. This is just

the beginning, I want to learn playing songs in the flute like the other senior didis and bhaiyas play. It really fascinates me very much.

Yogasana

I enjoy practicing various yoga positions like Mayurasana and Lotus Pose. I do yoga from six o'clock to six thirty in the morning. I like doing yoga in the morning as I think that yogasan makes me feel more relaxed and energetic early in the morning. I have realized that by attending the yoga classes in the morning I have become more flexible than I was before.

Satsang

I like singing songs about the Mother and Sri Aurobindo during satsang. I also enjoy quietly participating in satsang. We are taught many new devotional songs to which I grasp very quickly. Whenever chanting are taught to us by Sangeeta didi, I listen carefully to the mantras and learn it effortlessly.

Celebrations

During the celebration, I sang a song called "It Must Have Been Cold There in My Shadow" on November 29th. Although I attempted to sing the song, I did it very slowly and became confused, which affected my performance negatively.

New Year- During the New Year, I performed two dances: "Aut Samundar" and "What Do You Mean?" I struggled with "Aut Samundar" initially, making mistakes repeatedly. However, I learned it well eventually and performed it during the New Year celebrations.

Republic Day- On Republic Day, I participated in the flag hoisting ceremony in the morning and attended the flag lowering ceremony in the evening. I received a toffee in the morning, attended school, and then went to the ashram for the evening ceremony.

Sports Day- During Sports Day, I particularly enjoyed participating in gymnastics. I performed well, especially in the arm drill, which I liked the most.

February 4th- On February 4th, I participated in a drama performance in the evening. I took part in the same drama again later in the evening.

February 29th- On February 29th, many teachers gave speeches about the significance of the Golden Day. I listened attentively to the speeches. In the evening, I recited a poem at school and then had lunch. I also enjoyed playing Holi.

Trip

My journey began from Kechla, from where I travelled to Paliba. From Paliba, I boarded a train and travelled to Koraput. After Koraput, I proceeded to Howrah and then to Kolkata where I visited the Alipur Zoo. From Kolkata, I travelled to Guwahati and then to Tezpur. After Tezpur, I went to Rupa and then to Tawang, where I saw the China border. In Sikkim, I visited the Science City, and in Meghalaya, I visited the Elephant Falls and the Seven Sisters Falls. I then returned to Titlagad and proceeded back to Koraput before finally returning to Kechla.
