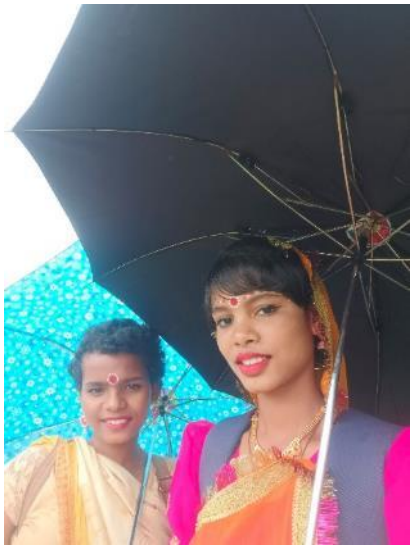
URVASHI GOUDA

REPORT for 2023-24 (First term)

DOB- 6th May'09

Attendance- 183 out of 183 days

INTRODUCTION:



My name is Urvashi Gouda, and I am 14 years old. I study at Auro-Mira Vidya Mandir. I was born on 24th April 2009, and I'm currently in the 10th grade. In my family, there are eight members, including me, my three sisters, one brother, my mother, my father, and my grandmother. My favourite colour is violet. I'm open and friendly with everyone, and I enjoy listening to others and following instructions. I have a strong interest in playing football and basketball. I find school to be an exciting place because I get to study, play, go on trips, and more. I go home once a week on Tuesdays.

English:

I have a fondness for the English language as it's my favourite subject. I'm confident in speaking it properly, although I occasionally make mistakes, which my teacher helps me correct. I've completed the 10th -grade course from NIOS, working through two English books.

I've learnt various aspects of the language, including metaphors and similes. I enjoy reading English books and novels, such as "Siddharth," "Young Samurai," "Death on the Nile," and "Geronimo Stilton." In group reading, I have read "The Kite Runner" and "A Thousand Splendid Suns." I appreciate reading novels and English books. I've also studied grammar and am currently preparing for my 10th-grade exams. My English skills have improved, and I aim to get even better by reading, writing, and speaking English.

Maths:

I'm currently studying both the first and second math books simultaneously. I've covered various chapters in both books, including arithmetic progression, linear equations, algebraic expressions, number systems, lines and angles, congruence of triangles, and quadrilaterals. While some chapters were easy for me, others were challenging, but I sought assistance from my teacher when needed. I enjoy math as it introduces me to new concepts.

After completing chapters, I take tests, and I usually score well. I've learnt a lot and want to continue improving my math skills.

Science:

Science is one of my favourite subjects because it involves practicals, experiments, tests, and question-answers. I particularly enjoy practicals and experiments. My teacher often shows us videos related to topics like Chandrayaan, G20, the most poisonous bugs in the world, and interesting facts. I've finished both 10^{th}-grade science books and am currently revising the 9^{th}-grade CBSE physics book. I've also completed the CBSE courses in Chemistry and Biology.

Physics: I'm revising the Ratna Sagar 10th-grade book. I've covered chapters like electricity and mechanical electricity. If I encounter difficulties in understanding certain words, sentences, or paragraphs, my teacher provides explanations. I've also finished the 9th-grade CBSE and Ratna Sagar physics books. While I make occasional mistakes, my teacher helps correct them. My test scores in physics are generally good. I've covered chapters on gravitational force, force and laws of motion, and electricity.

Chemistry: I have a liking for chemistry because I find it educational. I've completed chapters in chemistry from the NIOS book and also finished the 9th-grade CBSE book. Topics include acid, base, and salt, as well as molecules and matters. During tests, I usually score well. When I struggle with certain chapters, my teacher clarifies them for me. I even created a chart for the periodic table.

Biology: I've covered all the NIOS chapters. I've also completed the 9th-grade CBSE book, which covers topics like nature, pollution, air, and water. I've enjoyed conducting experiments with my friends and teachers. I've worked on various systems, such as the digestive system, respiratory system, nervous system, muscular system, kidney, liver, and heart. I also participated in creating an ant colony with my group.

Social Science:

I've completed both NIOS books in social science. Currently, I'm revising the 9th and 10th-grade CBSE books. My favourite subject within social science is history. I can quickly answer questions and usually perform well in tests. I've covered various topics in history, geography, and civics.

Hindi:

I enjoy studying Hindi, our national language. I've finished both NIOS books and am currently revising the chapters while also practicing grammar. I typically score well in Hindi and enjoy learning Hindi songs, writing essays and letters, and participating in free reading and group reading with my teacher and classmates. During reading, I pay attention to punctuation and generally score well in tests.

Dance:

I have a passion for dance as it allows me to learn different dance forms, poses, and steps. While practicing dance, I sometimes make mistakes, but my teacher guides me on the correct techniques. I sometimes feel nervous and scared when performing on stage, but I've participated in various dance forms, including folk dance, Kathak, Bharat Natyam, and Bihu. I dedicate time to practice different dance forms, and I've performed in several group dances on stage.

Computer:

I enjoy using computers for typing and drawing. While my typing speed is not very high, I'm working on improving it. I also create drawings, including images of houses, human figures, the sun, and more. I've used software like PowerPoint, Photoshop, Word, WordPad, and others.

Arts:

I particularly enjoy drawing paintings of nature, houses, villages, trees, and plants. When creating paintings, I focus

on accuracy and neatness. I often participate in art competitions and have a particular affinity for nature-themed art. I've explored various art forms, including stencil cutting and creating wall hangings.

Music:

I take pleasure in playing the flute. I play rags and songs with my group and teacher. I've learnt many rags and songs, such as rag Hansadwani, rag Bilawal, and rag Bhopali. I also had the opportunity to learn songs from the renowned singer Shantanu Bhattacharya, which I greatly enjoyed.

Games:

My favourite sports include football and basketball. I usually begin with exercises and running before playing games. I participate in various sports like football, basketball, Frisbee, basekick-ball, and volleyball. I've particularly enjoyed playing volleyball and have seen considerable improvement in my game and running abilities.

Yogasana:

Yogasana practise is something I appreciate as it promotes flexibility, fitness, and overall well-being. I've learnt various asanas, including the butterfly pose, scorpion pose, mountain pose, bridge pose, and swan pose. I carefully follow the instructions provided by my teachers.

Celebration:

I find great joy in participating in celebrations because it involves various activities, including plays, singing, jokes, and dances. I've been part of dances like "Radhe-Radhe" and "Aigiri Nandini." Additionally, I performed a puppet show for Ganesh Chaturthi and sang a patriotic song on Independence Day.

Tuesday Activity:

On Tuesdays, I engage in a variety of activities, including art, painting, Hindi, English, math, general knowledge, quizzes, music, and speech. Among these, I particularly enjoy music and painting. In music, I play the flute and sing songs, while in painting, I create drawings and pictures. We typically begin with an assembly with other children and teachers before these activities.
