Susant Bhoi

DOB- 13th May'15

Report for 2023-24 (First Term)

Attendance- 171 out of 183 days

Introduction

Sushant is eight years old. He is a regular school-goer. As his village is far, he stays with his grandparents and comes to school from there. He arrives at school neatly and is friendly with both his peers and teachers. Sushant's best friend is Joshib, and he enjoys eating noodles and poha without spilling food grains.

Projects

1. **Health and Hygiene:** Sushant joined the topic of health and hygiene a bit late, but he made valuable progress. He showed interest in learning about the steps of handwashing and actively participated in handwashing activities. His participation in a blindfold game demonstrated his tactile understanding of objects. Despite joining the topic late, his engagement and willingness to learn are evident.

2. **My Family:** Sushant created drawings and a family tree to represent his family members. While he could distinguish between his mother and father, he faced some challenges when asked about specific names, such as his father's name. This indicates his understanding of family relationships and his early attempts at remembering names.
3. **My Body Parts:** In the body parts topic, Sushant created drawings of body parts, including legs, and assisted his friends with their drawings. He exhibited a keen interest in learning the body parts song and sang it confidently and loudly, showcasing his enthusiasm for the topic.

4. **Shapes**: Susant displayed recognition of a few shapes and engaged in learning shape-related songs. Although he had some pronunciation difficulties, he contributed by drawing different shapes.
5. **Vegetables:** Sushant produced drawings of vegetables, particularly radishes, and demonstrated knowledge of various vegetable names in both Hindi and English. He confidently presented information about radishes in Hindi during a presentation. His joy and patience while working with clay to create corn indicate his creative and hands-on approach to learning.

Sushant's project report shows his involvement in different learning areas, as well as his eagerness to participate and learn, even when joining topics late. His confidence in singing and presenting, as well as his enthusiasm for hands-on activities, illustrate his commitment to his education and the joy he finds in learning.

English

Susant has a loud voice and a strong interest in singing. Although it takes him some time to learn songs, he sings confidently. In the class, he tries to communicate primarily in Hindi, using phrases, as he's new and hasn't learnt English yet. During

storytime, he occasionally becomes distracted and fidgets with nearby children. In "The Mice Wedding" drama, he had the role of a cloud but had difficulty remembering his two simple lines.

Hindi

Sushant is a cute boy who diligently tries to concentrate in class. He enjoys listening to stories and can create his own stories, albeit with some additional time. Sushant has memorized the names of shapes in Hindi. He may encounter some difficulties remembering the Hindi alphabet, but he puts in his best effort. He is also working on improving his Hindi-speaking skills. He has learned Hindi songs, including "Jo Bhi Kam Karo Tum Bacho" and "Bade Savere Bulbul Aati."

Maths

Sushant is an enthusiastic child who eagerly participates in the math class, displaying a keen interest in hands-on activities with materials like Rangometry and Judo blocks. He is creative in constructing patterns, designs, and models. While he enjoys these activities, he faces challenges when dealing with numbers. For instance, when asked to count non-linear patterns like those in a constructed vehicle, he starts counting from one and often stops midway. He can count up to 100 in one go using bead strings and can count backward from 20 to 1 without difficulty. However, transitional numbers like 89, 79, 69 often confuse him.

These challenges exist despite his genuine interest in mathematics. To progress to more advanced concepts, he needs to develop a stronger understanding of numbers and their relationships.

Arts

Susant takes immense pleasure in art class, where he engages in various creative endeavours, including drawing, paper folding, and craftwork. His drawings of tribal people

highlight his cultural interests and are vividly coloured. Additionally, he extends a helping hand to his peers after completing his tasks.

Puzzles

Sushant relishes the challenge of Noddy puzzles and has rapidly embraced the puzzle class. He can competently solve puzzles independently but occasionally prefers collaboration with friends. Sushant adeptly handles puzzles with 100 and 150 pieces.

Dance

Sushant has a deep love for dancing and enjoys Zumba dance. He learned "Vrindavan Mein Gopi Aaye" and performed it during Janmashtami. He tries to dance well and occasionally becomes shy when dancing alone.

Games

Susant is consistently active during games and often seeks to be the first in running and other activities. When upset due to conflicts with friends, he becomes silent.
