

PRABHAT KRISANI

ANNUAL REPORT FOR 2023-24 (SECOND TERM)

DOB: 10TH MAY - 09

ANNUAL ATTENDANCE 335 DAYS OUT OF 366 DAYS

INTRODUCTION -

My name is Prabhat Krisani, and I am a 14-year-old student born on May 10, 2009. I prioritize spending time with my family and focus on my studies. Currently, I am preparing for my 10th class examinations through the NIOS board, which are scheduled to commence on April 15th. I am diligent in my studies and participate in extracurricular activities.

I reside in the hostel and am satisfied with the provided amenities, including the food.

ENGLISH

I have completed the English curriculum and am now revising independently. Through practice with previous years' question papers, I can confidently answer questions. Additionally, I focus on enhancing my writing skills by practicing letter, notice, report, and message writing, along with active and passive voice exercises. Regular reading of course book stories and thorough comprehension of chapters further aid my preparation.

HINDI

Having completed the Hindi courses, I am currently in the revision phase while prioritizing subjects for the upcoming exams. Despite requiring minimal assistance, I ensure to regularly read the book contents to maintain proficiency.

SOCIAL SCIENCE

Both social science books have been covered, and I am now self-studying with

occasional clarification from teachers.

Revision includes solving previous years' question papers and practicing map work.

Thorough study of chapters and revisiting

previous question-answer sessions and self-made notes contributes to my preparation.

MATHS

Completion of both NIOS maths books has been achieved, and I utilize previous years' question papers for practice. I seek assistance from textbooks for challenging questions, and recent tests have been successfully passed, including practical examinations.

SCIENCE

I have completed the science curriculum and am revising independently. Regular practice with previous test papers, supplemented by clarification from teachers, ensures thorough understanding. I specifically seek guidance from subject-specific mentors for physics, chemistry, and biology doubts and diligently study notes provided by teachers.

FESTIVALS

At our institution, we joyously celebrate a variety of festivals, including Diwali, Christmas, New Year, Janmashtami, and Holi, among others. During special occasions like Bhaiya's birthday, we come together to sing songs and enjoy performances.

One memorable celebration was Diwali, which coincided with our excursion to northeast India. Amidst the breath-taking landscapes, we illuminated the surroundings with diyas and immersed ourselves in the spiritual ambiance by singing Ram Bhajans. Dancing alongside the locals added to the enchanting experience.

For Christmas, we engaged in a shadow drama, infusing creativity and festive spirit into our celebrations. Despite our busy academic schedules, we cherish these moments of communal joy and cultural expression.

While some festivals like the Mother's Birthday and Saraswati Puja couldn't be celebrated elaborately due to academic commitments, we still find time to partake in simple yet meaningful traditions. For instance, our observance of Holi is marked by the use of natural colours, promoting eco-friendly practices and communal harmony.

GAMES

Participation in sports activities such as football, basketball, and volleyball is instrumental in promoting physical fitness and instilling values of teamwork and sportsmanship. Among these, I find great enjoyment in playing as a forward in football and honing my skills in basketball dribbling.

Sports Day holds special significance as it provides an opportunity for us to showcase our talents and camaraderie through various performances and activities. Personally, I actively engage in the Army drill, where we execute exercises and formations that not only demonstrate discipline but also pay homage to our national flag and ethos.

Through sports and such events, we not only prioritize physical well-being but also nurture qualities like leadership, cooperation, and perseverance, which are invaluable both on and off the field.

SPORTS DAY

On Sports Day, our activities were diverse and engaging. We commenced with a march, followed by yoga sessions where we performed numerous asanas, creatively forming shapes and patterns. Subsequently, we escorted esteemed guests to our village to share our enthusiasm for physical activity and teamwork.

In the afternoon, the festivities continued with a variety of captivating performances. These included displays such as unicycle riding, pyramids, bamboo dances, army drills, gymnastics presentations, and skating exhibitions. Among these, I actively participated in the Army drill, where we executed a series of exercises and formations, depicting scenes of valour and respect for our national flag. It was a moment of pride to contribute to such a poignant display.

Moreover, I thoroughly enjoyed observing the performances of my peers, each showcasing their talents and dedication to the event. Overall, Sports Day was an enriching experience, fostering camaraderie, skill development, and a celebration of our collective achievements.

Trip to North-East

Our journey to the North-East was a mesmerizing exploration of diverse landscapes and cultural treasures. Embarking on the 29th of October, we commenced

our adventure from Paliba station, continuing on to Koraput, where we boarded a train bound for Titlagarh. Arriving early the next morning, we spent a night before setting off for Kolkata at 10 o'clock.

In Kolkata, we indulged in a visit to the zoo, where we marvelled at the rich variety of animals and birds, including Bengal tigers, crocodiles, snakes, and leopards. Later, we embarked on a train journey to Guwahati, where we immersed ourselves in the spiritual aura of the Kamakhya temple and explored the cultural heritage at Srimanta Kalakshetra.

Crossing the Koliabhomora Bridge, we reached Tezpur, where we explored landmarks such as the Shiva temple, Ganesh ghat, and the serene Brahmaputra River.

Continuing our journey, we ventured to Rupa, where we experienced the tranquillity of a village monastery before proceeding to the breath-taking heights of Tawang. Enroute, we encountered the stunning beauty of Sela, with its snow-capped peaks and the enchanting Changu Lake. Our stay in Tawang offered us the opportunity to visit the India-China border at Bumla Pass, where we witnessed the majestic mountains and encountered military personnel.

After concluding our time in Tawang, we journeyed to Kaziranga, where we embarked on an exhilarating safari, encountering elephants, rhinos, eagles, boars, and deer. Our travels then led us to Shillong, where we explored the captivating Mawsmi cave and witnessed the majestic Seven Sister waterfall.

As our expedition drew to a close, we visited New Jalpaigudi, Gangtok, and the revered Baba Harbhajan Singh's Mandir. In Kolkata, we marvelled at landmarks such as the Victoria Memorial and the Science City, enriching our understanding of history and science. Reflecting on our journey, we returned home with cherished memories and a deep appreciation for the diverse tapestry of culture and nature in the North-East.
