PRAMILA MUDULI

REPORT for 2023-24 (First term)

DOB- 18th August'08

Attendance- 183 out of 183 days

My name is Pramila Muduli, and I study at AMVM School. I am 15 years old. I maintain personal hygiene and cleanliness. I have been studying NIOS books, and my exams have recently concluded. I belong to the "Humility Group."

ENGLISH:

I have completed the NIOS 10th-grade course. I study English with Neela Di and Sangita Di. During English class, I sometimes read my course book or revise for my exams. I mostly spend my time revising for exams. If I ever find something challenging to understand, I don't hesitate to ask my teachers. Our group follows a practise where each of us learns one chapter from the book and then explains it to the others. This method helps me understand the chapters that were unclear to me. I also consult my teachers regarding grammar questions. I dedicate time every day to revise for exams, and I have already completed my English exam.

HINDI:

I study Hindi with Manisha Di. We've created a timetable for Hindi class, and on some days, my classmates and I go to the library to read whatever we like. In Hindi, we've finished the NIOS 10th-grade course. Di gives me complete book tests, and we

also learn songs for festivals in class. Di conducts tests every week, and I score well. I found that discussing chapters twice helps me understand them better. I read Hindi storybooks most of the time. If I can't grasp a poem's meaning, Di explains it to me. I've solved many previous question papers, and as part of our Hindi course, our group has watched videos. While some poems were easy to understand, others were more challenging. I have already taken my Hindi exam, and I found most of the questions to

be easy.

SOCIAL SCIENCE:

Bhavna Di teaches me Social Science. In class, we frequently have tests, and I've solved many previous papers. I have finished the entire book and am currently revising for my exams. Whenever I face difficulties in understanding certain chapters, I seek clarification from Di. Di gives me questions to solve, and I revise daily, including taking tests. In Social Science, we

learned about our country, villages, mountains, and seas. The section on revolutions, particularly the French Revolution, American Revolution, and Glorious Revolution, is something I liked the most. I've also

studied from the Ratna Sagar book and watched related course videos. While I found some civics chapters difficult, geography was relatively easier. I have just taken my board exam, and I found it easy, successfully answering all the questions.

SCIENCE:

I study Science with Ambika Di, Hari Bhaiya, and Kumari Di. In the past six months, I've solved many previous papers. I regularly take science tests, and if my performance is not up to the mark, I take them again. I appreciate the feedback from Di and understand it is for my benefit. I've put in a lot of effort in preparing for my exams. If I encounter any difficulties, I don't hesitate to ask for help from Di, and she always explains it to me. Sometimes, I find it challenging to relate to certain chapters, but I overcome this with consistent practice. I take multiple tests daily as my group divided their study time due to the nearing exams. I've just completed my board exam, and I found it to be easy. I was able to answer all the questions.

MATHS:

I study with Ambika Di and Srinath Bhaiya. There are two books for Math. I've completed the first book and made progress in the second one, focusing on topics like trigonometry and construction. I revise my lessons in preparation for exams. Whenever I encounter difficulties, I don't hesitate to seek help. I take tests after finishing each chapter and have attempted the complete book test three times. My board exam in Math was a bit challenging, but I managed to answer all the questions. I spend my mornings and evenings dedicated to Math.

GAMES:

I actively participate in sports every day. Before playing, I engage in running and exercises. I play different sports each day, including basketball, football, and volleyball. However, I occasionally had to skip playing to focus on my studies when exams were near. I play with many children and enjoy sports.

CELEBRATIONS:

During celebrations, I often partake in dance and drama performances. Occasionally, I and my classmates sing songs. I distinctly remember celebrating Raksha Bandhan, where we tied rakhis in groups. In addition, I performed a dance called "Aigiri Nadini" on the 5th of July. When learning dance steps, I would consult Di for assistance. I didn't participate in many festivals due to my upcoming exams, but I am enthusiastic about cultural celebrations.
