Ghora Jani

Gaurav is a regular child in school. When didis ask him something he starts crying. He does not even likes to sing songs. He does all his work with a very sad face. He colours very slowly and it is neat and clean. He always likes to do all the activities or plays with blocks. But his vocabulary is not yet developed. When he was in the older group he knew names of the colours and also names of the animals. He also knew counting but now he has forgotten everything. He likes to work by himself. He only works, when didis tell him to. It is very difficult to make him smile and to give an answer.
