Chhaya Muduli

DOB- 28- February 2011

Report- 2023-24 (first term)

Attendance- 183 out of 183 days

Introduction

I am Chhaya Muduli, 12 years old, and a student at Auromiravidyamandir School. I have a great fondness for my school and all the activities it offers. I appreciate the food provided, and I usually maintain a good temper. I interact politely with others, but on occasion, when I get angry, I may scold them. I am committed to keeping my surroundings and school clean. I have a genuine interest in all my schoolwork and respect my teachers. I study diligently and maintain discipline in school.

Science

In my science studies, I am currently engrossed in the 8th-grade book, specifically focusing on the 17th chapter, "Refraction and Dispersion of Light." This particular chapter has posed a bit of a challenge for me in terms of understanding some of the concepts. However, I must mention that I genuinely enjoy working through this chapter, particularly when it comes to creating diagrams related to lenses and the human eye. These visual aids enhance my understanding, making the

learning process more engaging. Over the course of my studies, I have successfully navigated through the preceding 16 chapters. These chapters were relatively straightforward for me to grasp, and I managed to complete the associated question-answer exercises independently, without requiring assistance from the teachers. As a matter of routine, I diligently prepare for and take tests upon completing each chapter. This approach has consistently yielded good results, and I have passed these tests with favourable marks. A distinguishing feature of my science education is the opportunity to engage in various experiments and activities. For example, I was particularly enthusiastic about an experiment involving the demonstration of the equality of angles of incidence and reflection, using simple tools like alpines, a plane mirror, and a piece of paper. In addition, I relished experiments pertaining to the "Chemical

vEffects of Electric Current" chapter, where I worked with electric devices and chemical substances, both of which I find intriguing.

Although I am somewhat reserved in the classroom and tend to speak less, I am attentive and focused during lessons. I actively listen to my teachers, allowing me to absorb the material effectively. Furthermore, I maintain punctuality, ensuring that I arrive on time for my science class. I consistently complete my homework assignments, demonstrating a sense of responsibility toward my studies. While my reticent nature leads me to answer questions posed by the teacher, I do not frequently ask questions during class. My goal is to become more proactive in this aspect and seek clarification when needed, thereby enhancing my overall classroom participation.

Maths

I am currently studying the 7th-grade maths book. Among its chapters, the one on mensuration proved to be the most challenging for me. I had difficulty understanding the concepts and remembering the formulas. It took me quite a few days to complete this chapter. Unfortunately, I scored only 9 out of 35 on the chapter test, resulting

in a failing grade. I am now working hard to prepare for the re-test in order to achieve a better score.

On the other hand, I found certain chapters like "Collection and Organisation of Data," "Mean, Median, and Mode," "Bar Graph," "Pictograph," and "Three-Dimensional Shapes" relatively easy to comprehend. However, topics like "Percentage," "Profit and Loss," and "Simple Interest" were a bit more challenging for me, although I managed to complete them promptly.

I tend to work more slowly on calculations when I struggle to understand the material. When this happens, I seek help from didi. After finishing the exercises, I make sure to check my work. I acknowledge that I need to improve my calculation speed. Additionally, I am actively working on improving my handwriting, as it is not up to my standards.

I make an effort to stay focused during class, but at times, I get chatty and may not always pay full attention to what didi is saying. Nonetheless, I consistently arrive on time for class.

Hindi

I have completed the 7th book and taken the whole book test. The test was easy for me to do, and I liked it. In Hindi, I also participate in group reading, dictations, story writing, free reading, and grammar. I am currently studying the 6th grammar book. I find it easy to answer the questions, but I struggle a bit with remembering the concepts. Nevertheless, I enjoy studying grammar. I also enjoy free reading because I can choose any book I want. However, I don't like group reading because some children read very slowly. I particularly enjoy dictations, as they help me improve my spelling. I also like story writing, which helps me enhance my writing speed. My handwriting is not very good in Hindi, so I need to work on improving it. My reading speed is good, and I always arrive on time for Hindi class. I try not to talk too much in class and disturb others.

English

We engage in various activities, including singing, group reading, free reading, dictations, writing exercises, and games. Among these, I particularly enjoy comprehension. I've already completed the 4th-grade comprehension book, and I'm moving on to the 5th-grade book. I found the comprehension book quite easy and completed it by answering the questions orally. I also work on grammar at times, and currently, I'm studying the 5th-grade grammar book. However, I struggle with grammar when I don't fully understand or remember the concepts. Free reading is something I look forward to because I'm allowed to read any books I like. Additionally, I participate in group reading.

Right now, I'm engrossed in reading "Swami andFriends," which I find very interesting. I've also finished reading the first two books of Harry Potter, which were equally captivating. Regarding writing work, I practice writing and have learned how to write a notice. I also read the books issued to me. I've read a variety of books, including Party," "Secret Cave," "All About Rockets," "Astronomy," and "Bodyguard: Ransom." Currently, I'm enjoying "The Bodyguard: Target." On July 5th, I participated in a drama performance titled "The Three Trees." I took on the role of the narrator, which I decided on my own. The dialogues were easy for me to remember, but I was quite nervous during the performance and struggled with remembering my lines.

For Janmashtami, I learned the song "Piya To Se Laga Jo Ye Mann." I was able to learn the song quickly, and during the performance, I didn't feel nervous because everyone was supportive. I realize that I need to improve my spoken English because I don't often converse in English. My handwriting also needs work, and I'm actively trying to enhance it. However, I am punctual and attentive during our English classes.

Social science

I am doing 8th book. In history I am doing the 16th chapter “The National Movement 1923-1939” The chapter was easy for me to understand. The question answers were also easy for me to do. Before this chapter I did the Struggle for Swaraj, growth of Nationalism in India, Changes in the art- painting, literature and architecture. I brought good marks in all these tests. In geography I am doing the chapter Agricultural Development- case study of India and USA. These chapters were very easy for me to understand. Before this chapter I did Major Agricultural crops, Agriculture, Natural resources- Minerals and Power resources, Natural Vegetation and wildlife and water. All these chapter were easy for me to understand. I got full marks on all these tests. On Mondays I watch Ramayana series of Ramanand Sagar. I liked these series I learnt many mythological facts. I am punctual to this class; I always concentrate and I am active.

Computer

In computer class, I am learning typing. I enjoy typing and am currently working on typing with the letters R and U. I have already mastered typing with the letters E and I. I have also learned how to print and have practiced printing. Additionally, I enjoy painting when my teacher (bhaiya) instructs me. I try my best to learn typing and generally enjoy computer class. However, there are times when I'm not enthusiastic about it, especially when

the computer does not work properly. Nevertheless, I concentrate in class, do not disturb my teacher, and always arrive on time for computer class.

Dance

I have a mixed relationship with dance. While I like to dance, there are times when I don't feel like it. I practice folk dance, not classical dance. On Ganesha Chaturthi, I performed a dance and thoroughly enjoyed it. The performance went very well, and I quickly learned the steps. Currently, I am learning a Punjabi folk dance, which I find very appealing. I find the steps easy to learn. Although I'm not an expert in dance, I try my best to dance correctly. I always arrive on time for class, avoid wasting time, and diligently practice the steps as instructed by my teacher (didi). I listen to her and enjoy my dance classes.

Arts

I enjoy painting, even though I'm not very skilled at it. I have learned various techniques, including stencilling, painting, drawing, creating designs with pistachio shells, making hangings, and crafting paper bags. I particularly liked stencilling, even though I'm not an expert. However, I find paper folding a bit challenging. I relish art class, always arrive on time, listen to my teacher (didi), and make the most of my class time.

Shramdaan

During Shramdan, I engage in various cleaning tasks such as toilet cleaning, mopping, sweeping, and filter cleaning. Occasionally, I also help remove spider webs. I particularly like mopping and sweeping, and I find filter cleaning enjoyable. I take pride in cleaning my building thoroughly and always listen to my teacher (didi) during Shramdan. I assist others when I finish my work, and I am punctual for Shramdan. I make sure to complete my tasks properly and help keep my building clean.

Gardening

In gardening, I perform tasks like digging, watering the plants, and weeding. I take pleasure in watering the plants and removing weeds from the field. However, I'm not very keen on digging. I do my best to complete all the tasks assigned by my teacher and do them properly and neatly. I usually arrive on time for gardening class, although there are instances when I might be a little late. I follow my teacher's instructions and diligently perform the tasks given.

Satsang

In meditation, I sing songs, prayers, and chants, and I recite poems. I like learning new songs during meditation and have learned many. Although I'm not a skilled singer, I make an effort to sing the songs to the best of my ability. I am punctual for meditation and do not disturb others during this time.

Sports

I like to play sports, which include exercises and games. I find exercises beneficial for my overall health, and I particularly enjoy running. I run on mountains, roads, and in the field. Among the games, my favourites are football and volleyball. I'm not very fond of playing basketball because I receive fewer passes. I also engage in other fun games, such as frisbee. I play these games correctly and complete my exercisesproperly. I arrive on time for sports class, maintain honesty, and do not cheat during exercises. I have a genuine love for sports.

Yogasana

I enjoy practicing Yogasan. Although I'm not very flexible, I try to do the asanas properly. I can perform many asanas, including Halasana, Bajrasana, Uthita padmasana, Sirsasana, Pashchimutasana, Surya namaskar, and many others. Some asanas, like Mayurasana, Handstand, and Scorpion pose, are a bit challenging for me, but I'm working on them. I am punctual for class and pay attention while doing Yogasan. I follow the instructions of my teacher (bhaiya) and practice yoga properly.

Celebrations

During celebrations, I participate in dramas, plays, songs, and recite poems, particularly those of Sri Aurobindo. On July 5th, I performed a Goan dance and thoroughly enjoyed it. The performance was excellent. Although I was nervous while performing on stage, I quickly memorized my lines and executed the actions smoothly. I particularly liked the play. On August 15th, I took part in a drama about the freedom movement and portrayed Swami Dayanand Saraswati. I found it easy to remember the dialogues and execute the actions. I also performed in a joke on August 13th, taking on the roles of sethji and ramji. Despite being nervous, I remembered the dialogues and the performance was excellent. On Rath Yatra, we sang an Odia song. Although I was nervous due to momentarily forgetting the lyrics, the performance went well. On Janmashtami,

I sang a song that I liked very much. It took me less time to learn the song, and I sang it confidently without nervousness. On Ganesh Chaturthi, I performed a dance with my group, quickly learning the steps, and the performance was excellent. I also performed a Pahadi dance, which I enjoyed, learned the steps quickly, and performed without nervousness. I cherish all the celebrations and enjoy the festivals.
