

DEVENDRA MUDULI

ANNUAL REPORT FOR 2023-24 (SECOND TERM)

DOB: 18TH JAN - 14

ANNUAL ATTENDANCE 363 DAYS OUT OF 366 DAYS

Introduction

My name is Devendra Muduli, and I am 11 years old, born on January 18, 2013. I study at Auro-Mira Vidya Mandir.

Hindi

In Hindi class, I study from 8:30 to 9:30 am with Manisha Didi, Darshana Didi, and Basanti Didi. Currently, I am working on the 6th-grade workbook and learning grammar. While I can grasp concepts from the textbook and lectures, I find grammar challenging due to its complexity. However, with practice, I am improving. I can effectively answer questions after understanding the concepts. Additionally, I participate in group reading sessions, focusing on "Badhte Kadam," which contains stories about mothers. During free reading, I enjoy Amar Chitra Katha and other small books, although I sometimes read too quickly and make mistakes. I am actively working on improving my handwriting, which currently needs improvement. Although I often make spelling mistakes in Hindi, I make fewer errors during dictation exercises. I also learn songs and participate in plays for festivals, such as the play about "Chacha Ji" and "Andher Nagri."

Science

Science is my favourite subject, and I am currently studying from the 6th-grade living science book. I have completed seven chapters so far. I find the chapters easy to understand because our teachers explain them thoroughly. They conduct numerous activities and experiments related to the chapters we study. I enjoy

performing experiments more than learning theory. Through experiments on topics like light, electricity, and magnetism, I have learned many new concepts, such as the straight path of light and the concept of magnetic fields. I have also experimented with various types of circuits and magnets. Occasionally, our teachers show us educational videos related to our lessons. After completing each chapter, we take tests, and I perform well, being able to answer all the questions.

Social Science

My social science class begins at 11:30 am. We completed the history syllabus last December, and I have not yet taken the history test. Currently, we are studying geography, and I am working on the second chapter. I find this chapter slightly challenging to understand. Consequently, my recent test results were not as good

as I had hoped, mainly because I found it difficult to revise adequately. However, I find the questions and answers in social science quite manageable. I study social science with Bikanti Didi and Neela Didi.

English

In English class, I enjoy reading a lot. Free reading is my favourite activity, and I can read books fluently. While I understand most of the stories I read, there are some difficult words that I struggle with. I've explored many books by authors like Enid Blyton, Roald Dahl, and Ruskin Bond, along

with historical comics, Tinkle magazines, and novels. Although my handwriting needs improvement, it's not very bad. However, I often make spelling mistakes, especially confusing letters like 'b' and 'd'. Constructing correct sentences is not a challenge for me, but sometimes, I make mistakes while writing stories. Occasionally, our teacher asks us to write stories and poems, and I particularly excel in creating creative stories and poems. Recently, I wrote stories for the Mother's Birthday. On Sundays, we have movie time, where we watch animated English cartoons. I can understand the movies I watch. While my speaking skills are not bad, I'm continuously striving to improve. I speak fluently in dramas, but I still struggle with stage fear. Currently, I'm working on class 4th grammar and book exercises.

Mathematics

In my mathematics class, which starts at 9:30, I am currently studying from the 6th-grade textbook. I find that I can comprehend all the chapters well. Presently, we are covering linear equations, which I find to be a relatively straightforward chapter. After completing each chapter, we have tests to assess our understanding. Additionally, we also have maths class sessions in the evening, which further reinforce our learning.

Computer

During the activity time at 2:30, I attend computer class, which I enjoy very much. In these sessions, I practice typing using Typing Master and type reports. I also engage in painting activities. Although my typing speed isn't very fast, I'm working on improving it. Lalu Bhaiya evaluates our typing speed every month.

Odia Class

I have Odia class twice a week with Papaji. I have learned all the alphabets and can read stories. I also write poems and stories in Odia, although I still struggle with some difficult words.

Dance

I attend dance classes on Mondays, where I learn both classical and western dance styles. While I enjoy western dance more, I also participate in dances for festivals. I am trained in classical dances like Bharatnatyam and Kathak, as well as folk dances like Bhangra and Assamese dances.

Yoga

Every morning from 6:00 to 6:30 am, I practice yoga with Bina Didi and Hari Bhaiya. While my body is not very flexible, I am working on improving my flexibility and balance. I participated in my school's annual sports day in January, where I showcased my skills in yogasanas. Additionally, I practice pranayama to enhance my breathing and concentration abilities.

Shramdan

Every day at 7:30 am, I engage in shramdan activities. These activities include cleaning our hostel, toilets, assisting in the kitchen by cutting vegetables, and maintaining cleanliness in our school. I particularly enjoy sweeping the roads and mopping the floor of the dining hall. Additionally, on Sundays, I take responsibility for cleaning my own room, including washing my clothes, blankets, and bed sheets.

Games Period

My games start at 4:15, where I begin with warm-up exercises and rounds of the big field before playing football, basketball, and base kickball. Football is my favourite, and I'm working on improving my skills by playing it twice a week.

Satsang

At 6:15, I attend satsang, where I pray to the mother and sing songs, especially patriotic ones, which I particularly enjoy.

Music

My music class is at 6:15 am, where I learn to play the tabla. I enjoy playing the tabla and have learned two tals so far. I have music class once a week with Harekrishna Bhaiya.

Celebrations

29th November: I sang the song "Wind Beneath My Wings".

Christmas: During Christmas, I participated by singing two songs, one in Hindi titled "Yashu Paida Hua" and another in English called "Noel". I particularly enjoyed singing the Hindi song.

Republic Day: On Republic Day, I began the day by attending the flag hoisting ceremony. Later, I watched the parade on TV in the hostel, witnessing men and women marching, along with army vehicles, tankers, and missiles. The pyramid formation was particularly impressive to me.

New Year: On New Year's Day, I performed two dances, namely the Clock Dance and "Aath Samandar". I enjoyed the "Aath Samandar" dance immensely.

Sports Day: During Sports Day, I participated in skating and had the honour of being the flag bearer during the morning march past. Later, we enjoyed various sports activities and received mementos. I also took part in cultural programs, performing in a play about freedom movements and another called "Andher Nagri", which was written by Cha-Cha Ji.

Saraswati Pooja: On Saraswati Pooja, I sang the song "Saraswati Maa Naman Karte Hai Hum" and thoroughly enjoyed learning and performing it.

The Mother's Birthday: For the Mother's birthday, I performed a slow-action dance based on a poem on the Mother. The poem's name was "Dream Boat", and I found great joy in learning and presenting this dance.

Holi: During Holi, our school organized various events. I played Holi with other children and indulged in snacks like omelettes, bhel puri, momos, lassi, and pani puri. Among these, I particularly enjoyed the pani puri and lassi.

Trip Report

My recent trip took me to the north-eastern part of India. It was an adventure-packed journey filled with diverse experiences. Here's a brief account of my travels:

I began my journey by packing my luggage and boarding a train to Titlagarh. After spending a night there, I continued my trip by train to Howrah. However, I found Howrah to be quite unpleasant due to its strong odours and unclean surroundings. Despite this, I made the most of my time there by visiting the zoo, where I encountered various animals such as lions, rhinos, tigers, and a variety of birds.

Next, I travelled to Guwahati, where I had the opportunity to explore the famous Kamakhya Temple. From Guwahati, I took a bus to Tezpur, where I visited Agnigarh and Shivji's temple. After a night's stay in Tezpur, I headed to Rupa for another overnight stay.

The following day, I embarked on a journey to Tawang, where I spent two nights. During my time in Tawang, I visited the China border and marvelled at the breathtaking scenery. After returning to Rupa for another night, I proceeded to Kaziranga, where I visited the renowned Kaziranga National Park and encountered a wide array of wildlife species.

From Kaziranga, I travelled to Shillong, where I witnessed the majestic Seven Sisters Falls. Afterwards, I returned to Guwahati before continuing my journey to New Jalpaiguri. From there, I travelled to Sikkim, where I explored waterfalls, indulged in some shopping, visited the Nathu La Pass, and admired the second largest monastery and Char Dham.

After my memorable experiences in Sikkim, I returned to New Jalpaiguri and then made my way back to Howrah. During my time in Howrah, I thoroughly enjoyed my visit to the Science City. Finally, I travelled by train to Koraput and concluded my journey by biking to Kechla.

Overall, my trip to the north-eastern region was filled with adventure, cultural exploration, and breath-taking natural beauty, making it an unforgettable experience.
