Rohini Gouda

DOB- 24 August 2009

Report for 2023-24 (First Term)

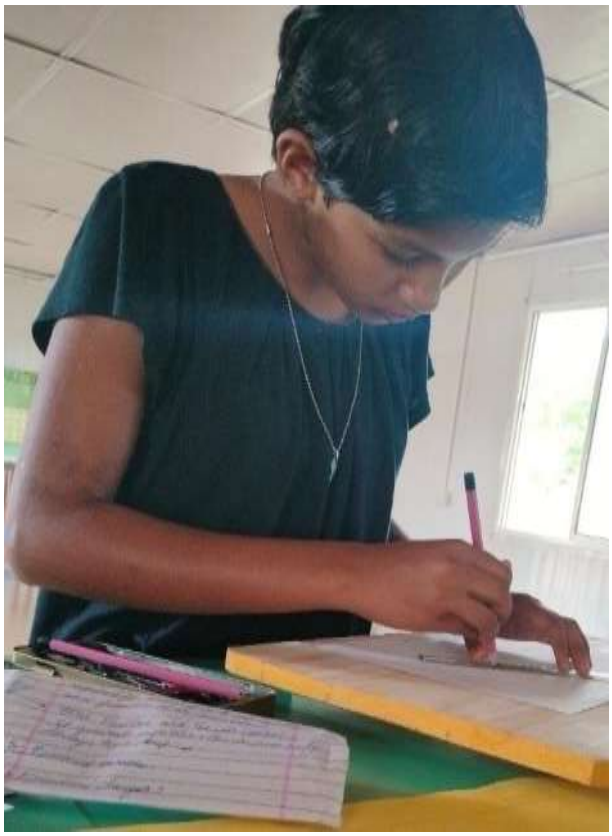
Attendance- 183 out of 183 days

INTRODUCTION

My name is Rohini Gouda. I like to study in the school.

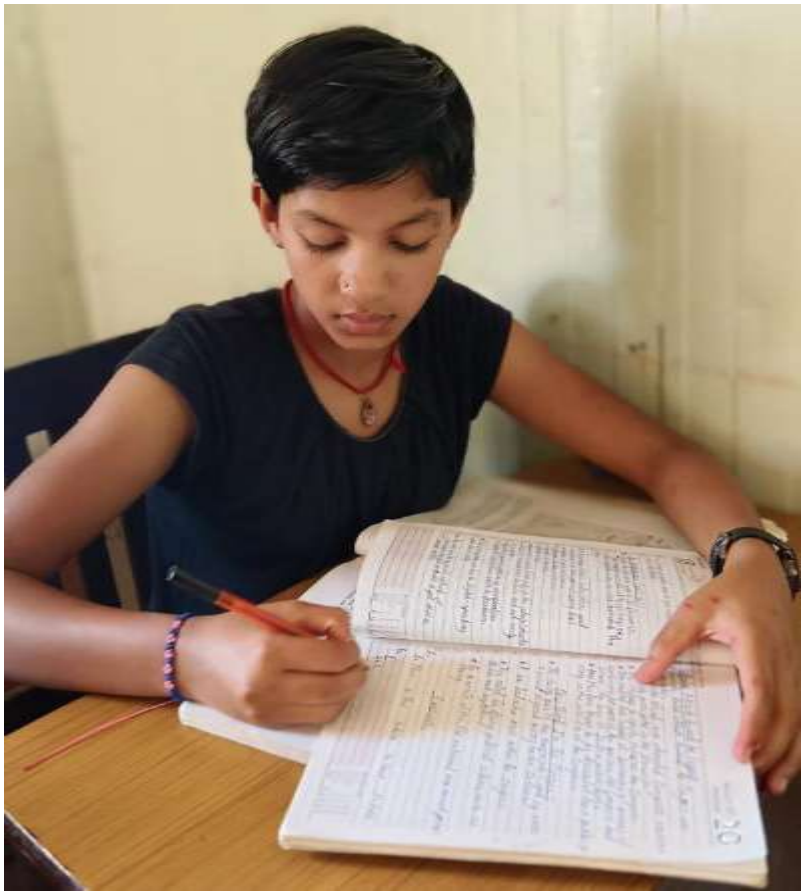
YOGASANA

In yogasana, I appreciate practicing various asanas, including Padmasana, Badhakohasana, Vajrasana, Naukasana, Sarvangasana, Savasana, Matsyasna, Halasana, Chakrasana, Shalabhasana, Dhanurasana, Ardhamaschindrasana, and more.



SCIENCE

In my science class, I've been studying the 8th-grade book. So far, I've completed several chapters, including "Force and Pressure," "Friction," "Sound," "Some Natural Phenomena," "Chemical Effects of Electric Current," and "Reflection of Light." In the "Force and Pressure" chapter, I had the opportunity to conduct various experiments. These experiments helped me understand key principles, such as how pressure remains the same at the same depth and how it increases with depth. I found these experiments very



interesting. While I grasped the concepts quite easily, I did face some challenges when trying to answer questions on my own. I am somewhat shy when it comes to speaking in class, but I perform well in tests.

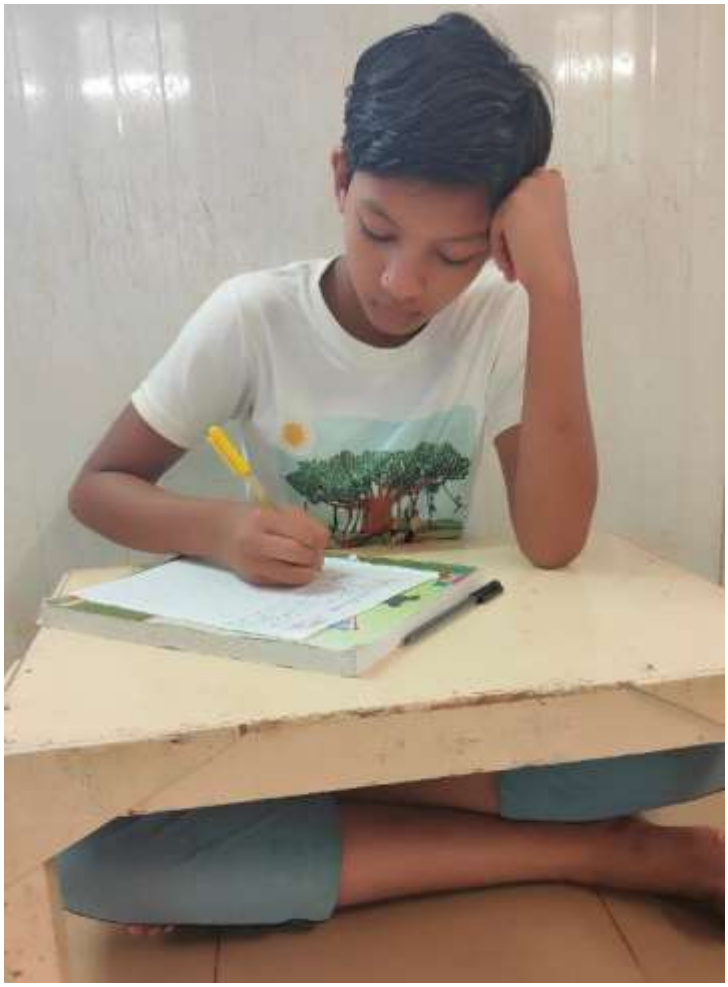
During the "Friction" chapter, I conducted an experiment to demonstrate that rolling friction is less than sliding friction. This hands-on approach enhanced my understanding of the subject. Again, I faced some difficulty in answering questions on my own, relying on the book for assistance. In the "Reflection of Light" chapter, I engaged in experiments to verify the laws of reflection and observe the number of images formed by two mirrors at different angles. I was particularly interested in these experiments, although I admit that I didn't fully comprehend the chapter. I found some aspects challenging, especially when it came to answering questions independently.

Currently, I am working on the chapter "Reflection and Dispersion of Light." I find this chapter a bit difficult, particularly when dealing with ray diagrams of convex lenses. Throughout my science classes, I consistently attend, listen to my teachers, complete my homework, and arrive on time. However, I do struggle with shyness when it comes to seeking clarification from the teacher. Instead, I often turn to my friends for help. Despite the challenges, I must emphasize that I genuinely love my science class, and it remains my favourite subject. If you have any specific questions or need further information, please feel free to ask.

MATHS

In mathematics, I'm currently studying the 7th-grade book from

NCERT, which I began around the end of August. Prior to this, I was working through the 6th-grade book. While studying the 6th-grade book, I enjoyed most of the chapters, but I did face difficulties in some, such as integers, linear equations in one variable, ratio, proportion, and unitary method. It took me some time to grasp the concepts in these chapters, but the other chapters were relatively easy for me.



I encountered challenges in the whole book test for the 6th-grade book and initially failed it twice. However, I managed to pass on the third attempt. Starting from August 31, 2023, I began studying the 7th-grade book, and I'm currently working on the 4th chapter, "Rational Numbers." Among the chapters in the 7th-grade book, I found "Decimals" to be the easiest. I'm facing some difficulties with "Rational Numbers."

After completing the chapters on integers, fractions, and decimals, I took tests for each of them and scored well. I actively listen to my teacher during lessons and am punctual for class. I genuinely enjoy mathematics, and I find it engaging once I understand the chapters thoroughly. Initially, I had trouble with word problems, as I found it challenging to understand the language and concepts. However, I have since improved, and I'm now able to comprehend and solve word problems.

I dedicate three hours to math each day, from 6:30 AM to 7:30 AM, 9:30 AM to 10:30 AM, and 7:00 PM to 8:00 PM. The time from 6:30 AM to 7:30 AM is reserved for Shramdaan, as I prepare for my exams in October 2024. I'm working diligently and striving to do my best in every test I take.

HINDI

Currently, I am studying the 10th-grade book in Hindi. Before this, I was studying the 6th-grade book. In Hindi class, I engage in various activities, including free reading, group reading, dictation, and story writing. Among these, I love free reading and story writing the most.

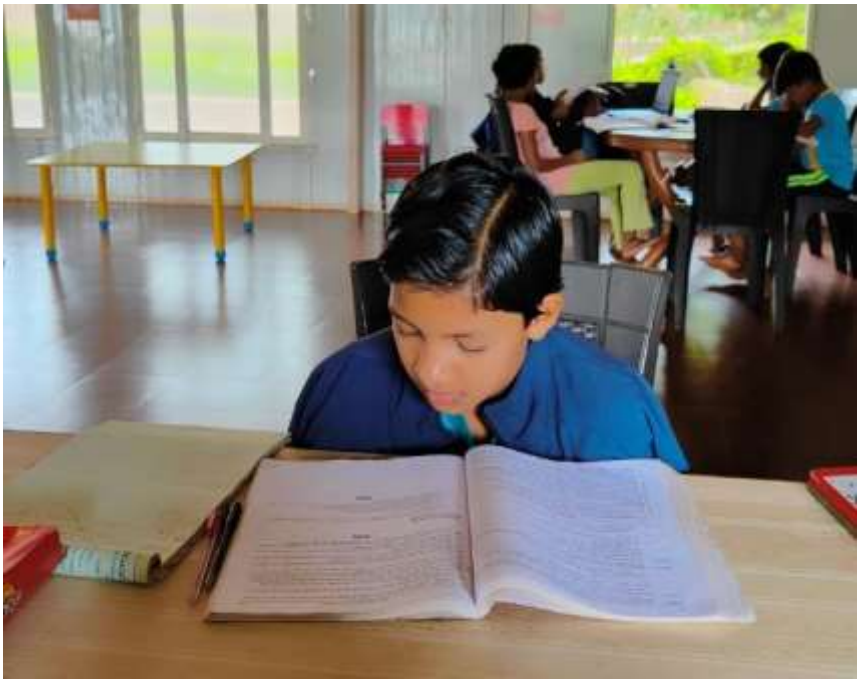
In the 6th-grade book, I completed only 13 chapters, and while I found them a bit challenging, they were mostly easy. During the whole book test, I scored 38.5 out of 55. I was studying the 5th-grade grammar, but I have now started the 10th-grade grammar. I've completed the first chapter in the 10th-grade grammar book. Currently, I have completed four chapters in the 10th-grade book, and they have been quite easy for me. I have a good understanding of these chapters, and I can remember them well. In the 10th-grade book, I sometimes have difficulty understanding the meaning, so I ask my teacher for clarification. While studying with my teacher, I can answer questions related to the chapter. After completing the chapter, I take the test and score well.

I am currently working on the 5th chapter, "Robert Nursing Home," which is an easy and enjoyable story. I find the poems a bit challenging, but the stories are straightforward. I am always punctual for class, and I pay close attention to my teacher. My handwriting is good, and I have improved my reading speed, which was previously slow. My writing speed is still slow, but I am determined to improve it. I love studying the 10th-grade book a lot.

ENGLISH

I'm currently studying the 10th-grade English book, and I enjoy it. Before this, I was engaged in free reading, group reading, grammar, and communication in class four. I have a strong affinity for reading, and grammar is one of my favourite subjects. I'm

presently working on the 5th-grade grammar book, and I find it quite easy. I don't face any difficulties with it. I genuinely enjoy doing grammar exercises.



I've also learnt a song for Janmashtami, and I sang it quite nicely. I enjoy the song and find it appealing. Around mid-August, 2023, I started working on the 10th-grade NIOS syllabus English course. I have completed a few chapters, including "Snake Bite," "How the Squirrel Got His Stripes," and "Tall Trees." I understood everything in these chapters, but there are some words whose meanings I'm not entirely clear on. I find the 10th-grade book enjoyable, filled with nice stories and poems. I'm always punctual for my English class. My reading speed is quite good, and my handwriting is also neat. While I can't speak proper English yet, I'm putting in my best effort to improve. My English has shown some improvement compared to the past, and I genuinely love the subject.

SOCIAL SCIENCE

In social science class I am doing 8th class book, I started this book around Mid-March. I have completed chapters like Modern period, The Establishment of Company Power, Rural life and society, The Revolt of 1857, Growth of nationalism. I have competed 16 chapters in History. In geography I have completed eight chapters. I loved studying the following chapters. Natural Resources- Land, Soil, water. Major agricultural crops. I am much more interested in geography. After the chapter gets over, I do the question

answer and give the test. I carefully listen to didi and I do my homework on time and I am always on time for the class.

ART

I enjoy my art class where I engage in activities like painting and drawing. Currently, I am learning how to use stencils, although I find it challenging. I used to have art class with Laxmi didi, and she taught me to make a paper bag. I also created a beautiful basket for my dance performance. I am always punctual for the class and attentive to my teacher. Although I sometimes make mistakes while drawing, I strive to improve. My drawing skills are currently limited, but I'm determined to get better. My interest in drawing fluctuates; when I'm interested, I can draw nicely, but when I'm not, my drawings suffer. Nonetheless, I love art class.

GARDENING

I undertake tasks like removing weeds, digging, providing plants with manure, and occasionally watering them. I am usually on time for gardening but not consistently. I follow my teacher's instructions, although I don't particularly enjoy gardening.

DANCE

In dance class, I am learning a Punjabi dance, and I have a great passion for dancing. I have previously performed dances on various occasions, such as the Goa dance on July 5th. I also participated in a dance competition on August 5th, performing to the song "Desh Rangila" and securing the first prize.

I thoroughly enjoyed these dances and have a deep love for dancing. I am punctual for class and always attentive to my teacher. I have experience in various dance styles like Garba, Contemporary, Bihu, Assamese, Punjabi, and more, although I do not favour classical and Kathak dance.

COMPUTER

In computer class, I am working on improving my typing skills with Typing Master. I find typing challenging, and I sometimes get bored with it. I am currently at cores four and cores one levels, and I can type reasonably fast. I am usually on time for the class and attentive to the teacher. Previously, I engaged in painting and drawing and was particularly interested in painting. I have also learned how to print a paper, which I found relatively easy.

MEDITATION

During meditation, I enjoy singing various songs. I make an effort to be punctual for meditation and actively participate, learning the songs taught with enthusiasm. We

commence meditation with the chanting of mantras. While I like meditation, I don't always feel the same level of enthusiasm for it.

ODIA

In our Odia class, we engage in readings, dictations, listening to stories, and watching Odia-related movies. I started off with a weak grasp of Odia, but I put in my best efforts to perform well and speak the language. When the teacher asks questions, I can provide answers. I pay close attention during class and work on improving my reading skills. My reading ability was initially quite poor, but I'm working on reading faster.

I have a keen interest in reading stories in Odia, and I'm fond of the language. However, there are times when I get bored and may not perform at my best. On Rath Yatra, we sang a song called "*Suro De Talo De*," but I found it challenging to sing loudly and felt nervous while performing on stage.

MUSIC

Always on time for class, sits properly, has a melodious voice, possesses a good sense of rhythm, knows sargams, and enjoys practicing with the harmonium confidently. She knows the proper placement of fingers and has learned Raag Bhupali. In music class, we sing songs and some raags. Nowadays, we have been learning the Bhupali raag. I used to be interested in singing, but not so much lately because I can't sing in a high voice. I am punctual for class, but not always. I listen to my teacher and learn the songs she teaches us, which I love to sing. I always concentrate in music class, and sometimes we play the harmonium. I can play the harmonium and enjoy doing so.

GAMES

I have a strong affection for playing games, with basketball and football being my favourite sports. While I don't enjoy playing volleyball, I

engage in basketball, volleyball, football, frisbee, and basketball. Before playing games, we start with exercises and running. I am punctual for games and always attentive to the teacher. My skills in games are not exceptional, but I make a sincere effort to improve. When I struggle to play properly, my friends occasionally scold me, but I take it as constructive criticism and aim to enhance my performance.
