Anjali Muduli

DOB- 13th April'13

Report for 2023-24 (First Term)

Attendance- 180 out of 183 days

Introduction:

Anjali is 9 years old and resides in the hostel. She handles most of her chores independently, although she occasionally gets her clothes washed at home. She is a very sincere and diligent girl, always willing to take on any task. Anjali is friendly with everyone, maintains a neat appearance, and arrives at school in proper attire.

English:

Anjali is consistently attentive in class and speaks English fluently, making an effort to use English during lessons. She has improved her comprehension of English stories and confidently participates in discussions. Anjali can create her own stories in English and illustrate them beautifully. She has mastered all 26 alphabets, their sounds, and a sound song. Anjali can distinguish between big and small letters, read two and three-letter words, and write her name in English.

Hindi:

Anjali is a highly intelligent girl who grasps new concepts quickly. When learning alphabets and their sounds from

picture cards, she swiftly catches on, especially when taught with a song. Her pronunciation is excellent, and she exhibits a strong eagerness to learn new things. Anjali actively participates in class discussions, answering questions promptly. Her attentiveness allows her to learn two poems and two songs, "*Lehra do*" and "*Meri Rakhi ki Dor*," quickly. She excels in storytelling, speaking clearly and confidently. Anjali creates drawings of various plants and trees, as well as body parts. She has also learnt the names of all the body parts and fingers. Anjali eagerly awaits her turn while playing different types of games.

Projects:

Plants: Anjali is a bright and intelligent student who quickly grasps new concepts. She is attentive in all her classes, clears doubts without hesitation, and actively participates in group discussions. She displayed a strong curiosity about plants, demonstrating a good understanding of different categories, including trees, shrubs, herbs, and climbers. She can recognize these categories and provide examples for each. Her drawings of plants and their parts, such as leaves and flowers, are beautiful. Anjali can describe photosynthesis and the importance of various parts of plants. She is also well-versed in naming cereals, spices, pulses, and oilseeds.

Water: Anjali's comprehension skills are stunning, as she quickly learns new information. In the Water topic, she thoroughly studied sources of water, uses of water, the various

forms of water, water pollution, water filtration, solubility, floating and sinking. She enjoys all the activities and can explain concepts like the water cycle, reasons for water pollution, and methods to control and filter water.

Air: Anjali enthusiastically participated in the Air topic, which included various experiments and activities. She demonstrated an understanding of important aspects of air, including its importance, differences between air and wind, air as a mixture of gases, air pollution, and ways to maintain clean air. She can differentiate between breeze, wind, and storm and explain the characteristics of air. Anjali has also created impressive drawings related to air pollution.

Body: The Body topic was an exciting exploration for Anjali as it focused on the human body. She quickly adapted to understanding the external and internal organs and their functions. She can explain the basic functions of organs such as the brain, heart, arteries, veins, lungs, liver, pancreas, intestines, gallbladder, and more. Her drawings related to this chapter are outstanding. Anjali actively participated in activities and performed well during question hour sessions.

Maths:

Anjali is a bright student. She takes lot of interest in doing Maths. In these few months she has made great many development. She recognises the numbers from 1 to 1000 in the ‘ganit mala’. When her group was taught number writing from 100-500, she could do quite fast. She wrote the numbers neatly with beautiful handwriting on the slate. She was able to add and subtract mentally and also showed improvement while doing the addition and subtraction in writing. She can add one-digit with one-digit, two digit and three-digit, two-digit with two digit and three digit, three-digit with three digit. She can easily do these addition by carrying over with

very little mistakes which is very rare. She can also do the subtraction by borrowing but she took a little longer to learn to borrow from the hundred digit place and add it in the tens digit place. She can compare three-digit numbers with >, < and = symbols. She also knows the greatest and the smallest numbers of different digits from 1-1000. She is able to make numbers using three different digits and can also arrange them in ascending and descending order. She is also able to write the numbers in expanded form and write the numbers in short form when they are in expanded form. She was also made to fill blanks with numbers with some numbers given in between. She took time and was a bit confused initially but can do it quite confidently now. She can also show numbers using the abacus of two codes. She always shows the numbers with the correct beads.

Arts:

Eagerly participates in all art activities. Her enthusiasm is apparent in her drawings, especially those of sunsets, which she colours meticulously. She also excels in paper folding and maintains the neatness and cleanliness of her work.

Dance:

Anjali is a dance enthusiast who enjoys various styles. While she's often shy about dancing alone, she can effectively follow the steps when teachers demonstrate. If she has fully learned a dance, she can dance alone and

even teach her friends. Anjali quickly grasped the steps for Ganesh Chaturthi's "Jay Dev Jay Dev" and performed it confidently on stage. She also performed a dance for the 15th of August, "Chak De India," energetically and taught her friends the steps.

Puzzles:

Anjali displays a strong interest in puzzles and consistently arrives on time for class. She is open to solving any type of puzzle and can complete 200-300 piece puzzles, often working with her partner Shiva. Anjali concentrates well during puzzle activities and is capable of completing puzzles on her own without complaints.

Singing and drama:

Anjali leads the group during singing sessions, showing confidence in solo singing. She rapidly learns lyrics and sings without hesitation. She enjoys reciting poems and excels in creating stories with moral lessons.

Games

Anjali's preferred game is base-kickball, although she's not particularly fond of playing games. Despite her lack of interest, she performs exercises thoroughly and rarely misses them.
