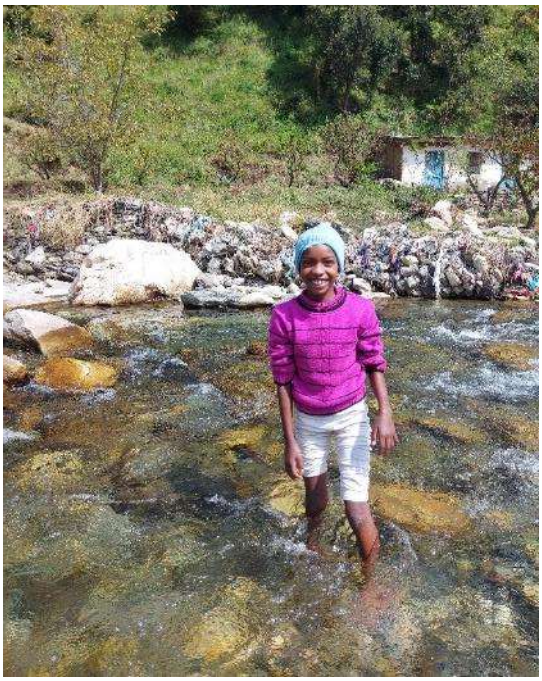
Sakshi Pukia

DOB- 29th May'13

Attendance- 183 out of 183 days

Report for 2023-24 (First Term)

Maths



Sakshi is a quiet girl. She likes doing maths and listens to things very carefully. She is able to understand things taught in class but takes time to understand concepts. She knows how to do addition, subtraction, multiplication, and division but has difficulties in dividing big numbers. She also knows how to use the abacus. She is slow in mental calculation.

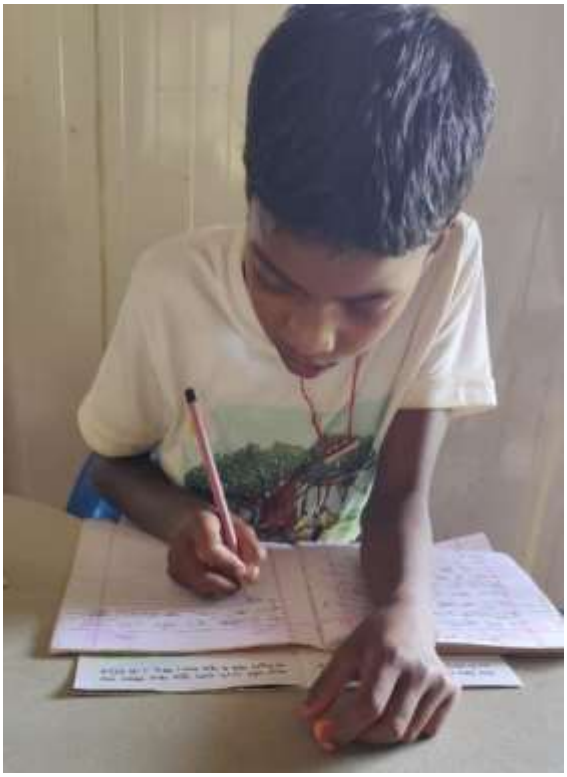
Many questions were given and she was asked to show on the abacus. She enjoyed doing the activities in measurement, such as measuring the height of her friend, length of the classroom, length of a tile, and pencil. She was doing well at measuring long distances but was having difficulties in measuring small things. She has to be shown the way of doing it again

and again to understand the concept. She can improve if she practises more on her mental calculation.

Projects-

Birds

While she answered questions in class, she occasionally found it challenging to provide complete responses. Bird-watching outings allowed her to observe numerous bird species, and she learned to recognize birds by their calls. Viewing birds through binoculars provided her with a unique perspective and added to her excitement. Shakshi actively participated in drawing birds and creating a book about them, which showcased her dedication to the topic. Her genuine curiosity and enthusiasm for birds were evident in her keen questions during documentary sessions.



Occupation

Sakshi had taken the occupation of a cobbler. Initially she did not know about the work of a cobbler, so she wanted to know about it and read many things about it. She did a role play on a cobbler and made a very beautiful drawing of a cobbler. Her drawing was very neat and clean.

Hindi

Sakshi has made substantial progress in her reading skills. However, she needs to work on her fluency as she pauses after each

word. She has completed writing the alphabets and constructing sentences. She is proficient in dictation and recently started story writing. Despite some errors in sentence construction, she strives to complete her stories. She consistently has her notebook checked. Sakshi finds grammar relatively easy and never hesitates to seek clarification. She consistently completes her homework and attends class. While she may take some time to learn songs and poems, she diligently repeats after the teachers. She is also learning Havan mantras and has made progress, although she faces pronunciation challenges with certain words.

English

Sakshi excels in reading, with good handwriting. She maintains proper posture while engaging in group reading but encounters challenges when self-reading and retelling stories. She needs improvement in dictation, particularly regarding spelling. Sakshi can fluently retell the stories she reads in English.Sakshi has a strong interest in learning dialogue lines for plays. She loves singing songs with actions and has seen many English movies, with "Pinocchio" being one of her favourites. She occasionally struggles to understand English movies due to unfamiliar accents. Sakshi should aim to be more open and attentive when participating in plays. However, she quickly learns her lines and remembers them for an extended period.

Odia

Sakshi takes interest in learning Odia. She can understand very little of the language but tries to speak as per her understanding. She has learnt the alphabets and tries to form small words using them. She loves listening to stories and also enjoys singing songs.

Arts and Crafts

Sakshi approaches art class with concentration and silence, showcasing neatly coloured drawings. She enjoys drawing, particularly with oil pastels, and faces minor challenges with shading, readily seeking assistance from the teacher. She delighted in brush spraying in art class.

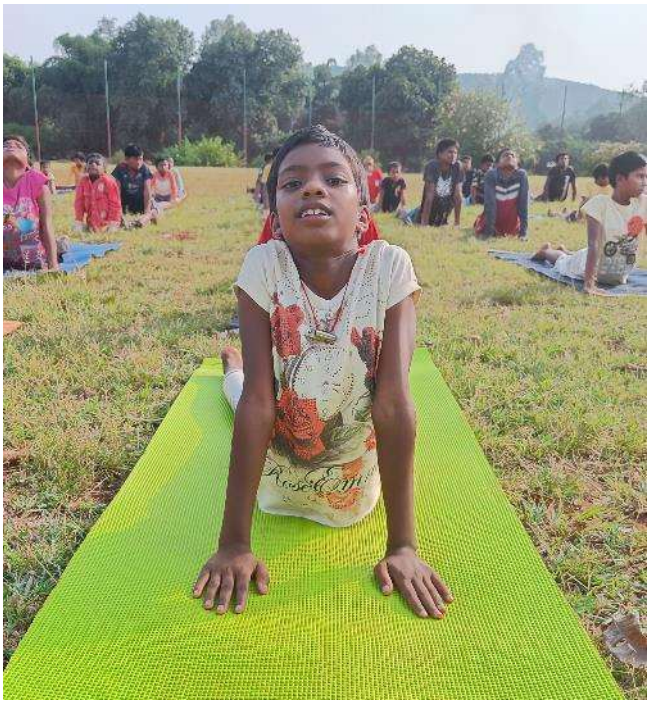
Puzzles

Sakshi takes pleasure in games such as matching identical puzzles during puzzle class. She finds smaller puzzles, like 150-piece ones, to be easy and can complete them swiftly. When faced with 500 pieces or more, she chooses to work with her friends.

Games and Sports

Sakshi likes to run and do exercise. She likes to do joint exercises sit-ups, hanging, windmill and jumping. She is in Carbon group. Her favourite sports are fun games like dodgeball and

base kickball. She does not like to play football. She likes to climb the hills and sometimes she goes for walks with her group.

Trip- For more details, refer to school report.


Celebrations- She is a quiet girl and very curious to learn English dramas but she is very nervous when she performs on the stage. She loves to dance. On Sri Aurobindo's birthday her role was of a common person. She likes to wear costumes.
