## Report for 2022-23 (first term)

### *Introduction*

My name is Shankar. I am in class 10<sup>th</sup>. I am in the Humility group. I like to stay in the hostel. I like to play and study. When I am free, sometimes I like to read books

and sometimes I like to play.

### *English*

I like attending the English class. At present, I am studying class 10<sup>th</sup> books of NIOS. I am giving the tests of the chapters that I have finished in the first book and also practising letter writing, notice writing, message writing, etc. In English class, sometimes I do reading and sometimes I do grammar. At other times, I study my class 10<sup>th</sup> NIOS book. I have issued many books from the library to read like “Young Samurai”, “Doctor strange” etc.

### *Hindi*

I have completed the first and second books of 10<sup>th</sup> class. I like to do Hindi class. I studied Hindi with Krishna (Aghi) didi. She taught me grammar and the chapters that I did not understand in the 10<sup>th</sup> class book. I also did Hindi class with Poonam didi. She taught me spiritual things. I practised speed reading. Now I am revising the 10<sup>th</sup> class book. I also gave tests on each chapter after studying them. I can read Hindi speedily and nicely. My handwriting in Hindi is good.

### *Mathematics*

In this period of April to September 2022, I have finished the first and second book of NIOS of 10<sup>th</sup> class. Now I am

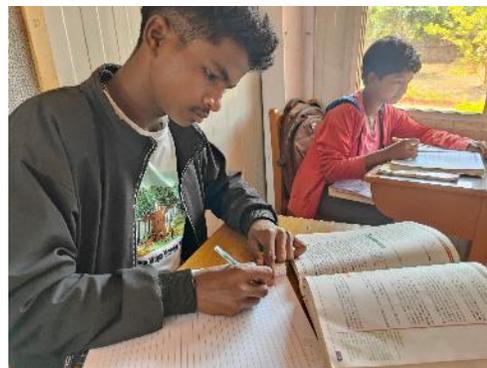

revising and giving tests of each chapter. In some chapters like “Concurrent lines”, “Construction” etc., I obtained good marks, but in some chapters such as “Trigonometry” and “Surface area and volume of solid figures”, I did not secure good marks. I am confident in geometry and statistics,

but I am not confident in trigonometry and mensuration, and I need more help in these chapters. I like to do Maths but it is a little difficult for me.

### *Social Science*

In Social Science, I have completed the syllabus of Civics and Geography of 10<sup>th</sup> class. After studying each chapter, I give a test. History and Geography are very easy for me, but Civics is a little difficult. In History

and Geography, I scored good marks. History is the easiest subject for me. I understand Geography very easily when I study it with maps. My teacher also gives me notes. I enjoy the Social Science class.

### *Science*

I like to attend Science class. I have nearly completed Chemistry from both the first and second book of NIOS. I have done half the chapters of Physics

and I did some chapters of Biology with Meeta didi. I can understand Chemistry nicely when my teacher explains me on the blackboard. In Science I did practical with Raghu bhaiya like electrolysis, circuit, parallel series, etc. We also did many experiments in Science class like ‘how to check if a compound is

an acid or base with litmus paper’ and many experiments about light energy in Physics. The chapters that I found a little difficult in the Science book were: ‘Chemical bonding’, ‘Chemical reactions’ and

'Equations'. The chapters that I felt were easy and I was confident of these chapters were of moving things and chapters of matter in our surroundings.

## Computers

I like to do computer class. In computer class I do typing practise. My typing speed is between 15 to 20 wpm. I am improving in typing but I will have to improve much more. I like to play typing games. My computer teacher is Lalu bhaiya.

## Music

In music class, I learn *tabla*. I am learning many *kayeda* in tabla class. I have improved in tabla but I will have to improve more. My tabla teacher is Lalu bhaiya. I like music class.

## Games

In games, I play football, volleyball and basketball. My favourite game is football. In football I sometimes play as a goalkeeper and sometimes I play

forward, but I prefer to be the goalkeeper.

## Celebration

On 5<sup>th</sup> July, we did a play called "Ouch!" and we did it nicely. From 5<sup>th</sup> to 10<sup>th</sup> August, we did many activities - speech,

quiz, painting and essay writing about Sri Aurobindo. On 11<sup>th</sup> August we celebrated *Raksha Bandhan* and tied *rakhi*. On 15<sup>th</sup> August, we did a play about Sri Aurobindo. Then we made a *Ganesh* idol and I narrated a story about *Ganesh ji* on Ganesh puja.

## *Shramdaan*

I like to do *shramdaan*. In *shramdaan*, I do gardening from 2:30 to 3:30 PM on Mondays and Wednesdays. In gardening, I take out weeds, do digging etc.
