Jagriti Jani

REPORT for 2023-24 (First term)

DOB- 14th October'09

Attendance- 183 out of 183 days

INTRODUCTION:

I am Jagriti Jani, a 14-year-old student in the 10th class at Auro-Mira Vidya Mandir. I reside in the village of Leduguda.

ENGLISH:

I have successfully completed both the 1st and 2nd course books of NIOS 10th class. I am currently engaged in revising for my exams. Our English class involves group reading and self-study. I particularly enjoy self-study as I prefer silent reading. We also cover grammar topics like 'Active and Passive Voice,' letter writing, message writing, etc. We've had Sandeep Bhaiya come in for group reading sessions, where we read books like 'The Kite Runner' and 'The Thousand Splendid Suns.' Presently, we are studying 'Siddhartha' with our teacher.

HINDI:

I've successfully finished both NIOS 10th-grade books, and now I'm revising for exams. I have also learned two songs in Hindi class, 'Hume Bharat Kahate Hain' and 'Gale Mein

Jiske Naag.' To improve our writing speed, we write essays and stories. We also visit the library for self-study and group reading. I have a good reading speed and neat handwriting, though I occasionally make mistakes with matras (diacritical marks). In grammar, we have covered topics like 'Prefix and Suffix,' sentence formation, transformation of voice, and we've even begun learning a bit of Sanskrit. Although I make some errors while speaking in Hindi, my teacher helps correct them.

SOCIAL SCIENCE:

I have successfully completed both the 10th class NIOS books, and for revision, I am studying the NCERT syllabus of the 10th class. I have already finished the geography book and am currently covering History and Political Science. In geography, I have studied chapters like 'Agriculture in India,' 'Minerals of India,' 'Tanks and Wells,' and more. I've taken tests and scored well. In Political Science, I am currently working on the chapter 'Union Government,' which I find a bit challenging, but I'm giving it my best effort. We also practice map-reading, both physical and political of India. We even did a puppet show on Ganesh Chaturthi. I greatly enjoy Social Science class, so I'm always regular and on time.

SCIENCE:

We study Physics, Chemistry, and Biology. I have completed both NIOS course books of the 1st and 2nd book, so I am currently revising the CBSE course books for my exams. We also watch videos related to general knowledge and science.

PHYSICS: I am working with the 10th class CBSE book. Presently, I'm studying the chapter 'Magnetic Effects of Electric Current.' In the 9th-grade book, I've covered chapters like electric current, gravitation, force and laws of motion, and sound. I've taken tests, scoring well in some chapters but not in others. Physics is a bit challenging for me, but I'm dedicated to giving my best.

CHEMISTRY: I'm studying the 9th class CBSE book. I've worked on chapters like 'Matter Around Us' and 'Is Matter Around Us Pure.' We even created a 3D model of the periodic table. I particularly enjoy Chemistry class as I like solving chemical equations and balancing them.

BIOLOGY: Biology is my favourite subject. It comes easily to me, and I consistently score system. My drawing skills are also commendable in Biology.

MATHS:

I have already completed the 9th class book in book, covering some chapters like real numbers, polynomials, and linear equations in two variables. Although I scored slightly lower in linear equations, I gave it my best effort. I also attend online classes

with Rakesh Bhaiya, where we are currently studying the chapter on similarity, which I find not too difficult.

DANCE:

I learn various forms, including classical, semi-classical, folk, contemporary, and more. I have performed dances on different festivals, including 'Aigiri Nandini' on the 5th of July, Garba on Janmashtami, and 'Bappa' on Ganesh Chaturthi. While performing on stage, I sometimes get nervous but still enjoy it. I have a particular affinity for folk dance and am currently learning Garba and semi-classical dance. We also learn mudras, and I have witnessed significant improvement in my dancing over time.

ARTS:

I engage in painting, drawing, origami, stencil cutting, etc. Currently, we are learning stencil cutting, though I find it a bit challenging, so I begin with easier projects. When drawing, we sit outdoors, observing nature, and drawing what we see. I can draw

well when looking at something but not from imagination. We create decorations for festivals, with oil pastel drawing being my preferred medium. I am consistently punctual for Art class.

COMPUTER:

Computer class takes place on Sundays and Wednesdays at 2:30 pm. I am fond of Computer class and always arrive on time. I practice typing to improve my typing speed. If I don't perform well in typing tests, I repeat them. When bored with typing, I turn to painting. I particularly enjoy painting and have also learned to use Photoshop and PowerPoint.

MUSIC:

I learn to play the flute. I continuously learn new songs and ragas, even those I don't like much. I pay attention to what my teacher teaches, and my fingering technique is good. I can play the flute smoothly. I've learned new ragas like Raag Megh and Raag Hansdhwani. I am always on time for Music class and practice singing with my teacher.

SHRAMDAN:

I help clean the girls' hostel, taking care of stairs, toilets, drains, and filters. I engage in Shramdan from 6:30 am to 7:30 am. I enjoy cleaning the girls' hostel, although it becomes less enjoyable when there is no water, and we have to carry it. I take pride in cleaning the toilets thoroughly and nicely, and when I finish early, I assist others. Drain cleaning and stair cleaning are tasks I particularly enjoy.

YOGA:

Yoga class takes place at 6:00 am. I learn various asanas, including Paschimutasana, Halasana, Salvaasana, Sarvaangasana, and more. Some asanas, like Mayurasana and Vrikshasana, I like more than others. While some asanas are difficult, I persist because I understand the benefits of yoga. With regular practice, my body has become more flexible. I have even learned to do a headstand. We start with warm-up exercises before beginning yoga.

GAMES:

I play basketball, football, volleyball, frisbee, and more. On Sundays, we have minor games, including basekick, touch ball, and dodgeball.

We begin with running exercises. I sometimes get tired during running, but I don't lose hope and continue to participate. We also run in the mountains, which I find enjoyable. I like playing basketball the most. Initially, I couldn't take leaps, but with practice, I can now perform well. I always arrive on time for Games class, as I wish to avoid punishment. I enjoy attending the Games class.

CELEBRATIONS:

I have taken part in several celebrations. On the 5th of July, I performed a semi-classical dance titled 'Aigiri Nandini.' On the 15th of August, we enacted a play related to the National movement. I had the role of Jawaharlal Nehru, India's first Prime Minister, and I enjoyed this role as I had to remember fewer lines. On Ganesh Chaturthi, I performed a contemporary dance with my friends and participated in the Pushpanjali ceremony to Lord Ganesha. On Janmashtami, I did a Garba dance with my friends.

TUESDAY ACTIVITIES:

On Tuesdays, we engage in various activities like dance, music, GK, craft, painting, maths, and more. My favourite is Math class, where our teacher gives us reasoning questions that I enjoy. In Music class, we create an orchestra and learn new songs. In Craft class, we make models, and in storytelling, we read stories and then narrate them to our friends. Each day, we partake in two activities, each lasting for an hour and a half.
