Mahim Gouda

DOB- 9th September'18

Attendance- 142 out of 183 days

Report for 2023-24 (First Term)

INTRODUCTION

Mahim hails from a nearby village and makes consistent efforts to attend school regularly. He is punctual and maintains a neat appearance. In class, he is reserved and enjoys running and playing with his friends.

PROJECTS

Mahim appreciates the project class. He has been involved in projects related to colours, vegetables, and fruits. While he is still working on remembering colour names and sometimes gets confused, he is improving with the guidance of his teacher. Mahim particularly enjoys creating drawings of vegetables and fruits, as well as colouring them. He enthusiastically participated in activities like potato stamping and clay modelling, where he made clay fruit models. Mahim also

enjoys exploring the outside world, observing trees and plants related to vegetables and fruits, and learning songs associated with these topics.

MATHEMATICS

Mathematics is an area where Mahim likes to count objects. He can count up to 20 and is working on expanding his counting abilities to 30, often seeking the teacher's assistance. He pays attention in class when others are counting and is adept at matching objects.

Comparing objects in terms of size, quantity, weight, and height is also an area he enjoys exploring. Mahim likes collecting objects like leaves, stones, sticks, beads, and flowers, using them to create patterns.

CELEBRATIONS AND FESTIVALS

Mahim has actively participated in school programmes. Despite feeling nervous on stage, he performed the song "I Salute My Flag" on the 15th of August and a dance on Janmashtami. He also sang a song on Ganesh Chaturthi. Mahim

loves watching the performances of other children during these events and enjoys the sweets available during such functions. He finds joy in participating in these zprogrammes.
